ENDS 31ST AUGUST 2004

Welcome

If you're looking for the widest, most comprehensive range of utility software available of any magazine, then you've come to the right place. After all, what other magazine can boast a DVD-ROM packed with more than 3,400 programs over 4.5Gb? Only one can – PC Utilities Plus+.

Our utilities experts have been pushed to their limits over the past few months to bring you this unparalleled collection of the latest and best freeware and shareware tools. Within the magazine you'll find programs covering every aspect of Windows, the Internet and computing in general. As an added bonus this issue, we've also secured four excellent commercial programs worth over £100, including Ashampoo Burn! (DataCD and AudioCD), AltiPad Notes Organizer and Paragon CD-ROM Emulator.

With such a massive selection of software on offer, we have no doubt that you'll find plenty of useful tools on this issue's DVD, so without further ado, insert the disc in your DVD drive and start installing.

Take a browse through what we have to offer in the latest edition of PC Utilities Plus+

Features

The top 40 Windows problems solved12

Windows is the operating system of choice for a large proportion of computer users, but that certainly doesn't mean it's free from problems. We solve some of the most annoying glitches you're likely to encounter.

Advanced CD creation.....20

If you bought a PC in the last few years, then chances are you have a CD writer. But are you making the most of your disc-burning buddy? We explore some of the more advanced CD creation options available.

Making music.....64

Modern PCs are capable of a lot more than just editing text files or handling spreadsheets. With the right software, you can compose your own music tracks – we bring you all the tools you need.

Featured programs

Feature: Ashampoo BurnIt! AudioCD

Ashampoo BurnIt! DataCD & AudioCD.....8

Make the most of your CD writer with these ease-to-use data and audio CD burning tools.

Paragon CD-ROM Emulator.10

Gain quicker access to data CDs by storing their contents in virtual drives on your hard disk.

Alfapad Notes Organizer.....11

Create an organised catalogue of data, rather than depending on scraps of paper and Post-it notes.

Getting started with the DVD

Learn how to get the most from this issue's cover DVD

Problem solving

I insert the disc, it spins up, and then my PC freezes. Then things start crashing. What's going on?

I installed an application and it doesn't work/crashes/is buggy!

Some applications work fine on most PCs but not on a small minority of computers. This is outside of the control of PC Utilities Plus+. The best policy is to visit the website of the person or company responsible for that application. They're likely to know much more about any potential problems and might have a cure or workaround. Sometimes downloading the latest version of the application fixes the problem.

The DVD won't work on my PC but works fine on those of my friends. A minority of older DVD drives have problems with newer DVD-ROM discs. This means they may not be able to read all DVD-ROM discs. Consider upgrading to a more recent DVD drive.

The disc used to work fine but now doesn't. What's gone wrong?

It might be that the DVD is dirty or has become scratched through mistreatment. Try placing it under a running cold water tap and gently rubbing the surface with a tissue to

it for replacement.

I keep getting errors saying that the browser program can't find 'browser.csv' or other files. However, I can access the folders on the DVD using My Computer without any trouble.

See the instructions above about returning Once again, this sounds like a faulty disc.

The disc used to work fine but now doesn't. What's gone wrong?

It might be that the DVD is dirty or has become scratched through mistreatment. Try placing it under a running cold water tap and gently rubbing the surface with a tissue to

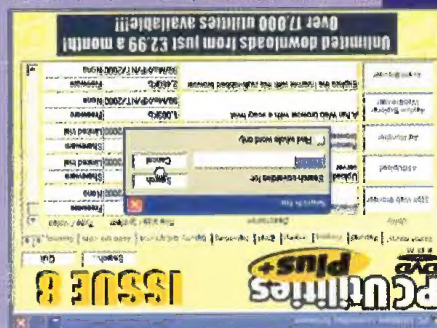

Getting started

1 Insert the disc in your PC's DVD drive and the cover disc browser should launch automatically. If nothing happens, double-click My Computer, and then double-click your DVD-ROM drive icon. Then double-click the 'browser.exe' program. Click OK to accept the disclaimer and then click on one of the tabs to choose a category.

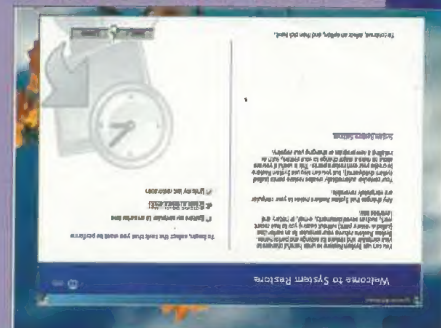

2 Click on the browser tabs above the description programs. If you have a particular type of program in mind, click the Search button. Then enter a search term. If you are interested in mp3 software, for example, try typing 'MP3' (without the quotes).

3 Click on a program name to install it. If the program is in a zip archive, you'll see a warning about the need for an archive manager. With most such programs (like WinZip) you can simply double-click the 'setup.exe' file to start the installation, though in some cases you will need to extract the contents to your PC.

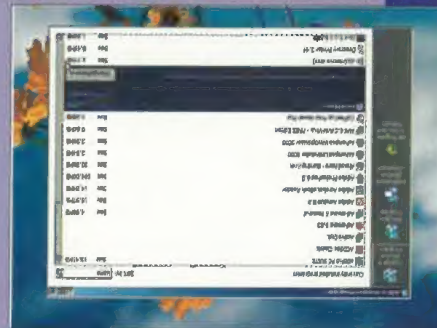

Remove programs

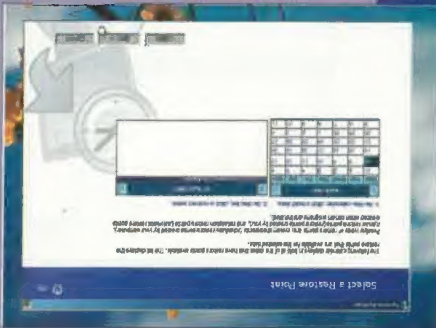

1 Before you install any program on our DVD, it's wise to create a System Restore point (if you're running Windows MeXP). Click Start/Programs/Accessories/System Restore. Click Create A Restore Point, and follow the wizard, giving the restore job a name (something like "before installing tool on DVD").

2 Once you're tired of any program, simply look for its entry on the Start menu (under Programs), and click the uninstall entry. If there isn't one then open the Windows Control Panel (Start/Settings/Control Panel), and double-click on the Add/Remove Programs entry. Then select the program from the list and click Remove.

3 In the small minority of instances where the uninstall comes up with an error you can use the System Restore point you created earlier. Just follow the steps above and choose to restore rather than create a new restore point. Try to avoid manually deleting the program files from your hard disk – this will probably cause problems.

1 Browser tabs The programs on the PC Utilities Plus+ are split into various categories, according to program type. If you're looking for music programs, for example, you'll find them under the Audio and video tab.

2 Search If you're looking for a specific program or type of application, the easiest way to find it is by clicking the Search button and entering your search term.

3 Search results The results of your last search will be listed here – these may be programs from anywhere on the disc.

4 Program name As well as listing program names, these buttons can be clicked to install the related software (if in .exe or .msi format) or launch the relevant zip archive.

5 Description This field provides a brief description of what the program does. In some cases, you will also find

important information in this field, such as a website to visit to receive a program unlock code.

6 System This field lists the operating systems under which the relevant program should work. Although we try to provide accurate information, we cannot guarantee that a program works for a given OS even if listed here.

7 Program type Most of the programs on our coverdisc are either full featured programs or freeware, which mean you can use them for as long as you like with no restrictions. Shareware software, on the other hand, can be trailed for a limited period only. After this period, you will need to register the software to continue using it.

8 Notes Any restrictions in the use of the software will be listed here. In the case of shareware programs, this may include the length of the trial period.

Unlimited downloads from just £2.99 a month!

Windows 95

Please note that we do not guarantee any of these programs will work under Windows 95. You should however find that a large proportion of 98-compatible programs also work under 95.

Disclaimer

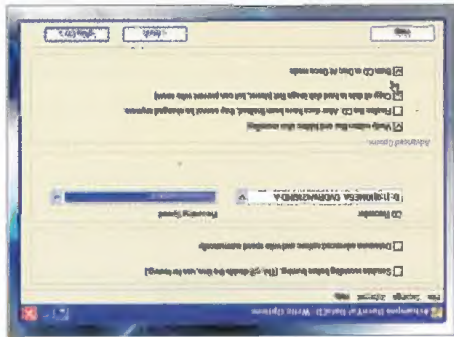

Some of the programs on the PC Utilities Plus+ cover DVD have the potential to seriously damage your PC if used incorrectly. It is your responsibility to thoroughly research a program and its function before using or installing it. PC Utilities Plus+ Live Publishing International and/or any associated company or individual cannot be held responsible for any problems arising from use of the coverdisc. You install and use the programs on the disc at your own risk.

US disclaimer

US law only allows you to make one backup copy of any software or media, for personal and archival purposes only. This is the intended purpose of the copying and extracting software supplied on the coverdisc. Any other use is strictly prohibited and we will not be held responsible for misuse of any of the included programs on the disc.

Ashampoo BurnYai! DataCD and AudioCD

Create your own audio CD compilations and back up valuable data with Ashampoo's powerful, easy-to-use burning software

It is possible to override the Advanced options manually rather than using the default settings

Not only is Ashampoo BurnYai! incredibly easy to use, it looks great, too. While it's busy burning a new CD it shows you what it's doing by displaying a CD on fire. If you're the sort of person who doesn't like fancy pictures and would prefer instead a precise list of what the pro-

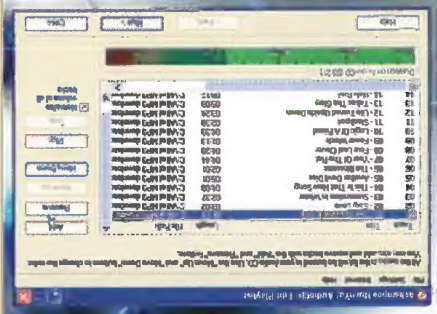

gram does so don't worry if you've not familiar with them. Our step-by-step guide below shows you how to work with multise-

session discs. It's possible to reuse a multise-

session disc. It's possible to reuse a multise-

session disc. It's possible to reuse a multise-

Create an audio CD with BurnYai! AudioCD

1 Ashampoo BurnYai! AudioCD enables you to use songs in a number of different audio formats. These include .wav and .mp3 files – any .mp3 files you add are automatically decompressed, ready for burning. To add tracks to your audio CD, click Add and choose which songs you want to include.

2 When you are happy with the order of your chosen songs, click Next to move on to the Write Options screen. It's possible to ensure it's been written correctly, although this doubles the burning time. It's best to leave BurnYai! to determine the advanced options.

3 As soon as you click Write CD, BurnYai! begins analysing your chosen tracks in order to prepare them for burning. If you left the Normalize option ticked in Step 1 the preparation stage takes a little longer, as you have to wait for the volume of each track to be checked and set.

Registering the programs

In order to use Burn Yai AudioCD and DataCD without restrictions, you will need to obtain registration codes from Ashampoo. During the installation process, tick the "Get full version key box". Immediately after installation you are then taken directed to the Ashampoo website. Enter your email address and you'll be sent a link to the registration details page – fill out your personal details and choose a password. You will then be emailed your registration key. Copy and paste the licence key provided into the registration box (you'll find this under internet/register) to be unlock the full program. You only have to enter your personal details once – when you install the other BurnYai program, all you have to do is choose the internet/register option to receive the registration code by email.

Upgrade offer

If you like what you see in BurnYai AudioCD and DataCD, you're sure to like their more advanced sibling, Ashampoo CD Recording Suite. We've teamed up with Ashampoo to give PC Utilities Plus+ readers the opportunity to upgrade to Ashampoo CD Recording Suite for just US\$14.99 – a saving of US\$15! For more details on what this advanced tools is capable of, visit www.ashampoo.com/products/0210/upgrade. Visit www.ashampoo.com/shop/0210/upgrade.

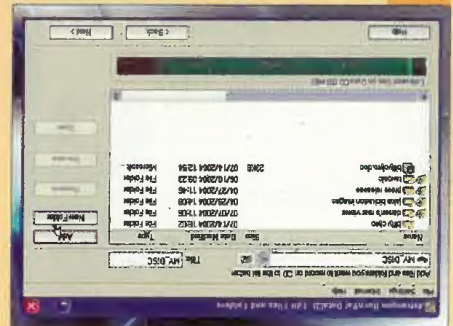

Location	!featuringashampoo_burnyaudio130_lp_gb.exe & ashampoo_burnyaudio130_lp_gb.exe

Add data to a multi-session CD with Burn Yai! DataCD

1 When you make a data disc you have the option to keep it open so you can add more files in the future. This type of disc is known as a multisession CD. To add more files to an existing Data Disc from the DataCD main menu.

2 You can now see what is currently recorded on the multisession CD in your drive. To add more files click to the CD click Add and select the files and folders of your choice. Files that haven't yet been burned onto the CD are shown with an open folder and green arrow next to them.

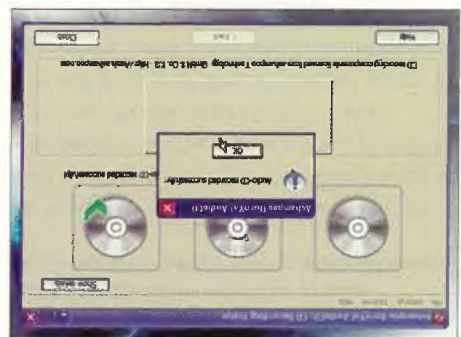

3 This screen should look familiar as the writing process is very similar to that of making an audio CD. The program first prepares the CD, which doesn't usually take very long, and then moves on to burning the data. You'll be able to play the finished multisession CD in any CD-ROM drive.

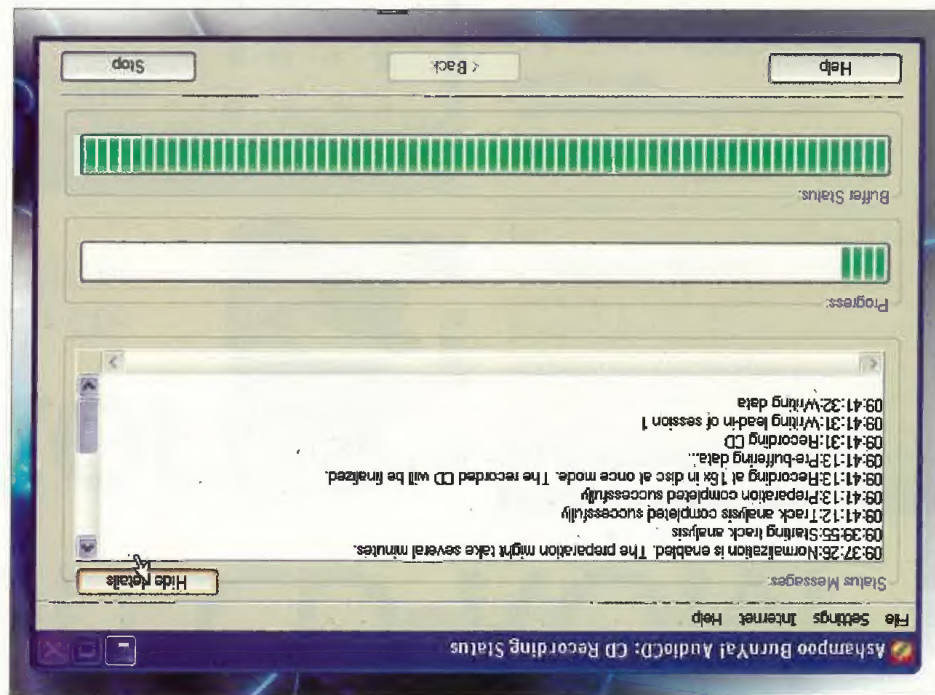

gram is up to you, you can change the display to a detailed log of completed tasks at the press of a button. Some CD-writing programs have trouble working with older or more obscure drives, and users of these drives are often reluctant to try out alternative software to that originally supplied with their burner. However, compatibility is all but guaranteed with Ashampoo BurnYai as the software supports over 1,500 different CD burners. While both these programs are superb, they are slightly limited in their functionality. You can't, for example, copy discs directly (you have to copy the source disc to your hard drive first). For every other CD burning use they are difficult to beat.

It shouldn't take long to go from choosing files to having a successfully burned CD in your hand

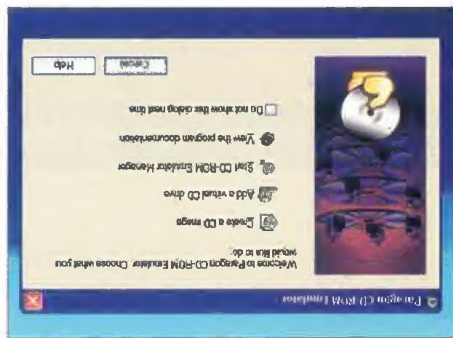

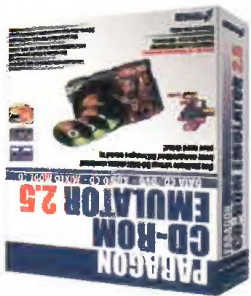

Click on Show details when BurnYai is writing your CD to view a detailed log of each stage

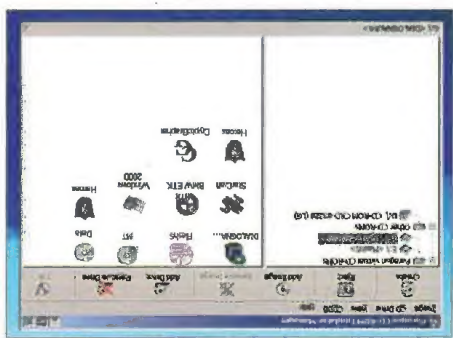

Paragon CD-ROM

Emulator

Keep your most frequently used CDs within easy reach by storing them on virtual CD drives

The main menu grants easy access to new creation tools and existing virtual discs

The program stores a full list of your emulated discs within the Emulator Manager

Paragon CD-ROM Emulator can be used to create several 'virtual drives' on your system. By using your hard drive space, the program can store all of the information from a CD (both data and audio discs), mounting it onto one of these emulated CD drives. When you attempt to run the program, instead of believing that it's still on a disc in a CD drive. Not only is this clever, it's also very useful. Using the program is easy, and you don't need to have a vast knowledge of PCs to do so. Each action of the program

uses an easy-to-follow wizard to guide you through the emulation and grabbing process. Once the contents of a disc have been grabbed to the drive, you'll have a new virtual CD that can be accessed via the program's virtual CD drives. As well as the CD grabbing and emulation options, the program is also outfitted with a range of administration tools which enable users to take full control over these new drives. All drives and images can be made available to the operating system, and it's even possible to set a virtual drive to run on system startup. Created CD images can be 'inserted' and

Firstly, load up Paragon CD-ROM emulator. Insert the CD you wish to emulate and click Create. Select the image format (from CD, ISO, file etc) you wish to use. You can also choose the level of compression used in the image as you step through the wizard. Select the required option and continue.

The next step is to choose a destination drive. If you only have one drive, or partition, you don't need to worry. But, if you have more than one, you will need to select which of the drives available you wish to host the emulated disc on. The wizard will display required and estimated space, as well as available drive space.

Once you've gone through the wizard, you'll reach data from the CD, compress it and mount it onto a virtual drive. This process can take a long time, so be prepared for a wait. Once done, you'll have a virtual drive ready and waiting.

Emulate a CD with Paragon CD-ROM Emulator 2.5

Location	Featuredepdcd25.exe

This upgrade offer is valid until 31 December 2004.

Alfapad Notes Organizer

FEATURED

Don't rely on scraps of paper to store notes. Put them all in one place with Alfapad

mail clients like Microsoft's Outlook Express make it easy to manage your contacts' various mail and email addresses and telephone numbers. However, unless you're using a more advanced tool like Outlook, you won't be able to manage other types of information, such as a To Do list or schedule and you may instead need to rely on the likes of Post-it notes or a desktop diary in order to manage your busy schedule.

Alfapad Notes Organizer is a good solution to this problem, as it enables users to store small pockets of information in an easy to browse, Windows Explorer-style hierarchical display. The program is split into two panes, the left-hand side with the right-hand pane displaying the contents of the currently selected note.

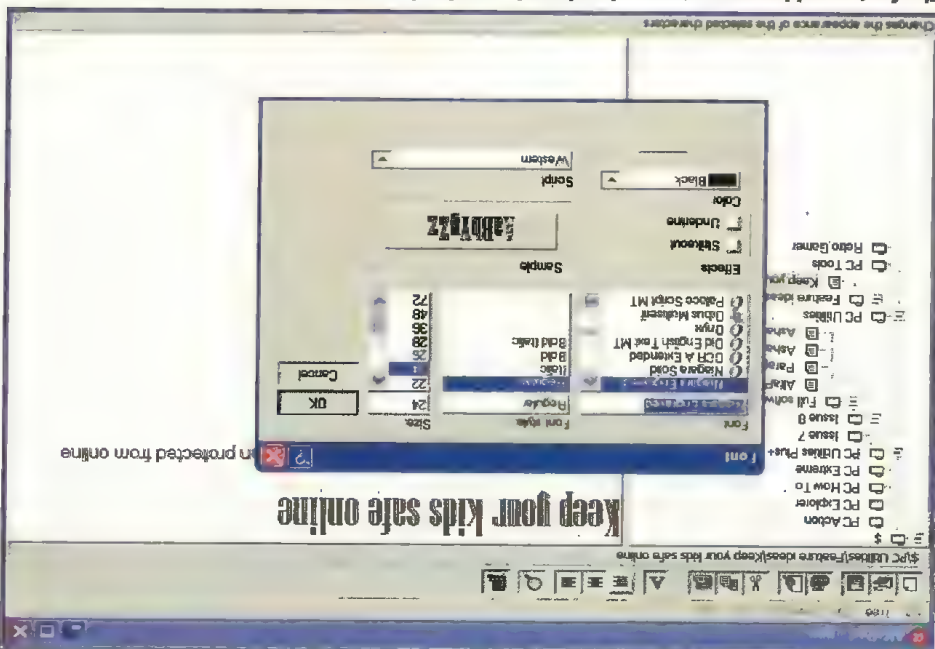

Although the program is relatively simple, there are a few

Registering the program

In order to use the program beyond the 30-day trial, you will need to enter a serial code. From the program's Help menu, select Register and enter whatever username you wish to use. In the Registration Number field, enter JDH-837-4298 and click the Register button. You can now use the program for as long as you like without limitations.

more advanced options on offer. For example, if you click Tool/Options you can select which note collection the program should start with, including a new collection. It is also possible to password-protect the program so that unauthorised users cannot access your notes.

The fonts used in your notes can be altered to make them more readable or striking

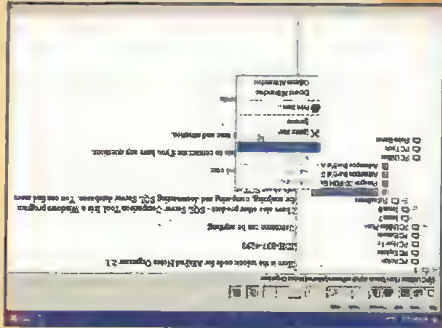

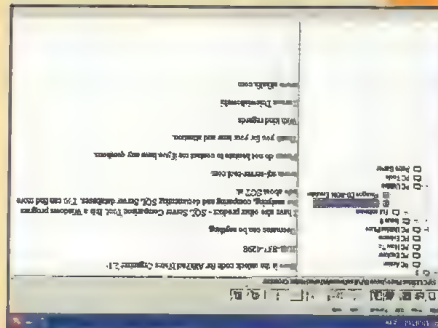

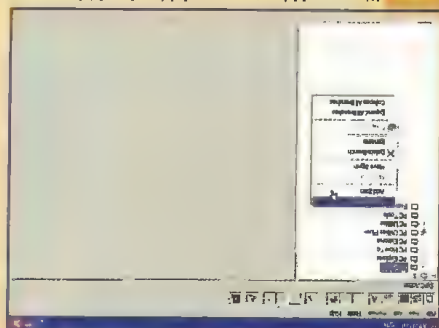

Location	W:\alfapad\alfapad.exe
File size	495KB
System	98/Me/XP/NT/2000
Notes	Full program
Limitations	None
Contact	www.alfalfa.com

Organise your notes

It's a good idea to create folders in which to store your notes. To do this, right-click on the \$ folder and select Add Branch. Type in the name of your new folder and hit Enter. After creating folders, you can move them to a different branch by holding down the left mouse button and dragging them to a new location.

2 To create a note, right-click the folder (or branch) where you would like to store the note and click Add Item. Click the New Item text in order to change this to a more suitable heading and press Enter. You can now enter text in the right-hand pane. Text can be formatted using the Format/Fonts option.

3 After creating a note, you can move it to another folder by dragging and dropping it to a different branch in the Explorer pane on the left. If you wish to change the order of notes or subfolders on a single branch, right-click the item and select Move Up or Move Down.

The Top 40 Windows problems solved

When you have trouble with Windows there is no need for despair – we root out some of Windows' most troublesome gripes and explain how to fix them

Internet Explorer, Outlook Express, Windows Explorer and Media Player, each in their own section. Of course, we can't cover every single problem you're likely to encounter, so here is a selection of common ones that you are likely to come across at some of the more complex problems and solutions, but others we've included are more trivial.

We don't expect you to read this article from start to finish because it is intended to be a reference guide. Save it and keep it somewhere handy near your computer. Even if you don't currently have a problem, you might have one tomorrow or next week, and the solution could well be listed here.

g gathered together a collection of 40 of the most troublesome Windows problems. We have also covered the operating system's main components, including

One of the most common methods of fixing problems is to reinstall Windows. By formatting the hard disk and reinstalling, you start with a clean state. It is guaranteed to fix everything and this is why you so often hear people say they reinstall Windows at least once a week. It is not that the operating system is so buggy that such drastic methods are the only solution, it's because they don't know how to solve problems. You shouldn't need to resort to such desperate methods though, because we have

Windows is a reliable operating system, provided you don't install or run anything. Once you do, there is a potential that things will go wrong. It is not always the fault of Windows though – badly written or buggy hardware drivers are to blame for some faults, and utility software downloaded from the Internet or installed from CDs are to blame for others. Windows does have its fair share of bugs and problems, but so does any operating system. In fact, someone once said, "The only programs that do not contain bugs are trivial ones that do nothing important." It's true: all big and complex programs contain bugs and try as they might, the programmers can't eliminate them all.

Windows Explorer

CD swapping

If you use Windows Explorer to view the contents of a CD, the CD name is displayed on the left and the CD contents on the right. If you effect the CD and replace it with another, the name on the left is updated, but the contents on the right may still show the old disc. This problem was fixed in Service Pack 1. Use Windows Update to download and install it.

Missing icons

If you have more than one operating system, Windows XP may not be on drive C. This may prevent Windows Explorer showing icons in the Folders pane. The solution is to use the subst command to point to the drive containing XP. Click Start/Run and enter 'cmd', Type 'subst c: x:', replacing x with the drive XP is installed on.

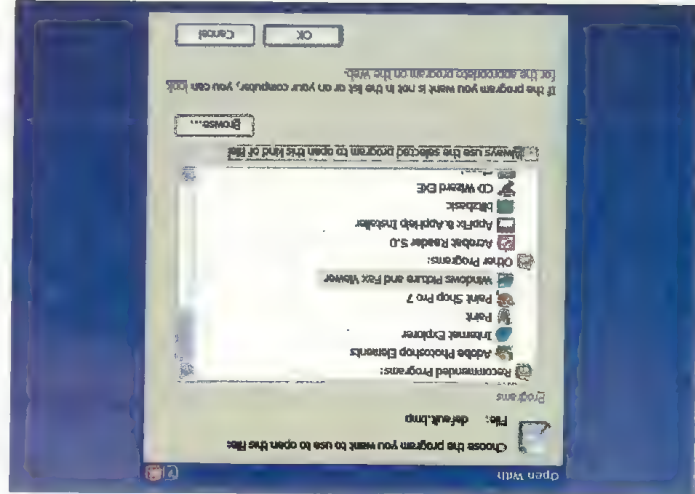

Cannot rename CD-R/RWs

If you put a blank CD-R or CD-RW in the drive, you might expect to be able to rename it in an Explorer window just as you can with other folders and disks, but it will not work. The solution is to rename the disc when you write data to it using the CD Burning Wizard process.

The wrong file

Double-click a file in an Explorer window and the associated application should run and load the file. If the wrong program starts or you get an error message, you must repair the association. Right-click the file and select Open With/ Choose Program. Pick one of the programs listed

Use this dialog to repair the associations between programs and their files

A matter of style

In the dialog box and tick the option at the bottom labelled Always use the selected program to open this kind of file. If the right program isn't listed, click the Browse button and select the .exe file on the hard disk.

Slotch-like performance

Does your computer sometimes run very slowly? Do the simplest tasks seem to take forever? When this happens, right-click a blank area of the taskbar and select Task Manager. Select the Processes tab and check the value in the CPU column for explorer.exe. Sometimes Explorer gets in a muddle and hogs all the CPU cycles. This problem was fixed in XP Service Pack 1 so use Windows Update to download and install it.

Missing floppy

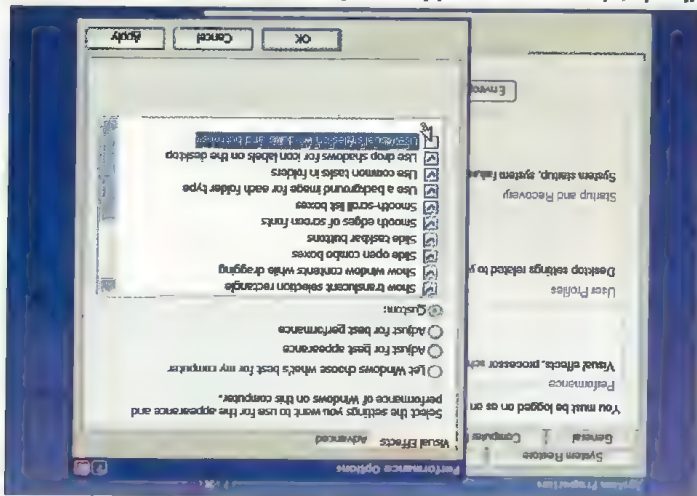

When you switch on your computer and start XP, you may see an irritating message prompting you to insert a floppy disk in the drive or click Cancel. This happens if you use the Restore previous folder when you logon feature and you shut down or restart the

computer with a floppy disk drive window open. Windows naturally tries to restore the floppy disk window or disable the Restore feature. In any Explorer window, select Tools/Folder options. Select the View tab and clear the tick against Restore previous folder when you logon.

Can't copy to CD-R/RW

Windows XP may not recognise that a CD-ROM drive has CD-writing capabilities, and so prevent you writing to a disc. Fortunately, you can set the drive's capabilities in the registry. Click Start/Run and enter 'regedit' then go to HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Explorer\CD Burning\Drives. Click the volume GUID (the weird key on the left) for the drive and double-click Drive Type on the right. A value of 1 specifies a CD-R, 2 is a CD-RW and 3 is a plain CD-ROM drive. Enter the appropriate value.

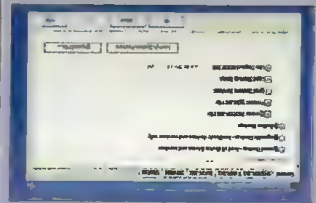

Visual styles can cause problems with some monitors

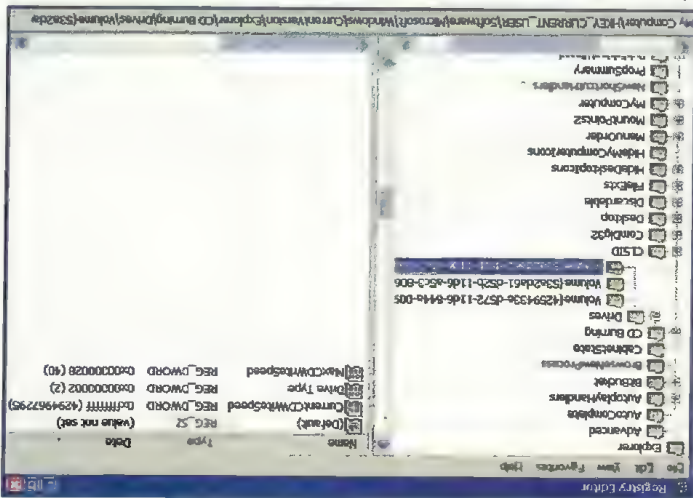

Clean boot your PC

Performing a clean boot may help to track down problems by eliminating unnecessary programs loaded with Windows. Click Start/Run and enter 'msconfig'. On the General tab, select Selective startup and clear the ticks against Process SYSTEM, MIN, Process WINLMI and Load Startup Items. On the Services tab, select Hide all Microsoft services, then clear the ticks against any remaining items. Try restarting Windows. If there is still a problem then try an even cleaner boot. Clear the tick against Load System Services on the General tab.

This utility can be used to disable problem programs loaded when booting up

The Drive Type value on the right is set to 2, which indicates this is a CD-RW drive

New drivers

[illegible]

Media Player

Video clips are highly compressed and require special software to decompress them called a

Eradicate clicks and pops

If you play an audio CD and the music contains irritating clicks and pops, it means that your CD-ROM drive is not compatible with digital playback. If you

If you play an audio CD and the music contains irritating clicks and pops, it means that your CD-ROM drive is not compatible with digital playback. If you

If you move an audio or video file in Windows Explorer, the entry in Media Player's library is not updated. If you then play the file in its new location, a new entry is added. After a while, the library contains lots of bad links and when you try to play files, Media Player skips the bad ones until it comes to a good one and you will wonder why the wrong file is playing. If you

Analogue as the playback method.

have Media Player 7, select **Tools/Options** and go to the **CD Audio** tab. In the **Playback Settings** section, click **Use error correction**. If this does not cure the problem, clear the tick next to **Digital Playback**. If you have **Media Player 9** or the **Windows XP** version then select **Tools/Options** and go to the **Devices** tab. Select the **CD-ROM drive**, and click the **Properties** button. Tick **Use error correction**, but if that does not cure the problem then select **Analog** as the **playback method**.

PC Utilities Plus + Volume 8

Kernel errors

WINDOWS

HKEY_CURRENT_USER\Software\Internet Explorer\Control Panel new account. Now delete c:\Documents and Settings\youroldname and rename the new folder name to the old folder name.

View tab). Log off and log back on with this new account. Now delete c:\Documents and Settings\youroldname and rename the new folder name to the old folder name.

Unexpected passwords

When you upgrade to Windows XP, it is possible for XP to assign a password to your account, even though you never had one before. Of course, you can't log on to XP because you don't know what that password is. You'll find it in c:\Windows\Setupact.log and this text file contains a line that says "Random password for Username is XXXX". If the computer uses the FAT32 filesystem you can create a boot disk on a Windows 98 PC, boot up with it, then enter:

```
c:
CD \Windows
type setupact.log
```

Irritating messages

With the NTFS filesystem you need to boot up using the Windows CD and select the recovery console before entering those commands. If the text scrolls up the screen too quickly, press Ctrl+F5 to pause it.

Are you plagued by dialog boxes that pop up stating that you or a program has requested information from the Internet? This is followed by the Internet connection dialog and log on. The problem is Windows Messenger. Double-click the Messenger icon in the system tray to open it and select Tools/Options. Go to the Preferences tab and clear the tick against Run this program when Windows starts. Other programs can start Outlook Express and select Tools/Options. Go to the General tab. Clear the tick against Automatically log on to Windows Messenger.

Forgotten password

What if you have forgotten your password and cannot log in to XP? Log on using another account with administrator status then click Start/Run and type 'control userpassword2'. All the accounts on the computer are listed and you can select your account and click the Reset Password button. Enter a new password and you can log off then log back into your account.

Windows XP

Fight corruption

If you have a disk problem and files are corrupted, you may see this error message: "Windows cannot load your profile because it may be corrupted. You may be logged in using a temporary User Profile." In other words, you can't log on under your usual name. The solution is to add a new user in User Accounts in the Control Panel. Make the back on using the new account. Then copy all the files in c:\Documents and Settings\youroldname to c:\Documents and Settings\yournewname. Make sure that system files and hidden files are visible in Explorer (click Tools/ Folder Options and go to the

Repair Internet Explorer

If Internet Explorer's files become damaged, it will not work properly. To fix the problem in XP, click Start/Run and enter 'sfc /scanow'. This runs the system file checker and problem files are replaced (you may be prompted to insert the Windows XP CD). If this does not solve the problem, you can re-install Windows over the top of itself. Pop the CD in the drive and select Upgrade in the installation type box. You can also switch on with the XP CD in the drive and boot from it, then select the Install option.

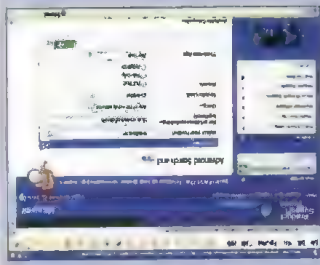

If you try to re-install Internet Explorer, it may tell you that it is already installed. However, you can fool Windows into thinking you have an old version so that you can continue. Click Start/Run and enter 'regedit'. Go to HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Active Setup\Installed Components {89820200-ECBD-11cf-8B85-00AA005B4383} and change the value from 1 to 0.

Software screw up

The solution is to use System Restore to Programs in the Control Panel, some cannot. After installing new software on your computer, you may find that it becomes unstable and problems occur. Although most programs can be removed using Add/Remove Programs in the Control Panel, some cannot. The solution is to use System Restore to return Windows to a previously working state. Click Start/ All Programs/ Accessories/ System Tool/ System Restore. Select Restore my computer to an earlier time and click Next. A calendar is displayed and dates in bold contain restore points. Choose one from before the problems started and click

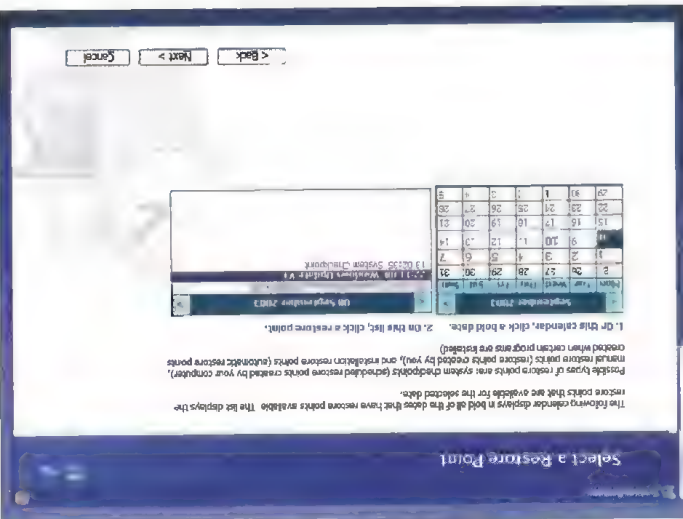

Run Internet Explorer then select Help/ Online Support and you will be taken to Microsoft's Knowledge Base at <http://support.microsoft.com>. This is packed with thousands of errors, bugs and problems, along with their solutions. If you have a problem with Windows, type it into the search box and click the green button to see a list of possible solutions. If you click the Show Options link, you can specify the product from a drop-down list, such as Windows XP, Internet Explorer, Outlook Express and so on. This makes the search more specific and improves the likelihood of finding the solution.

Microsoft online support

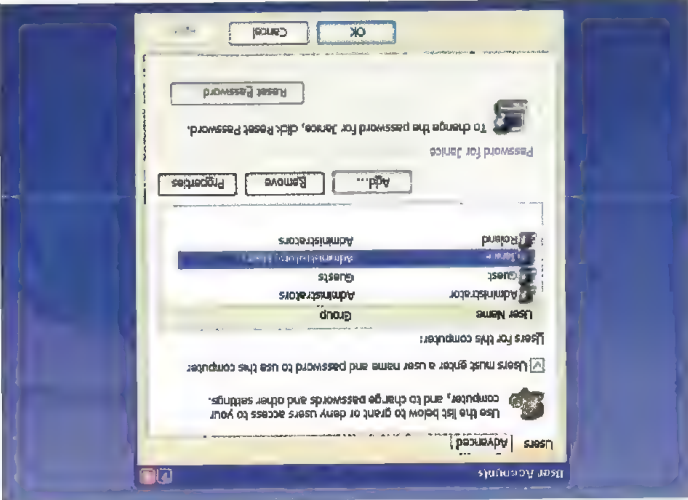

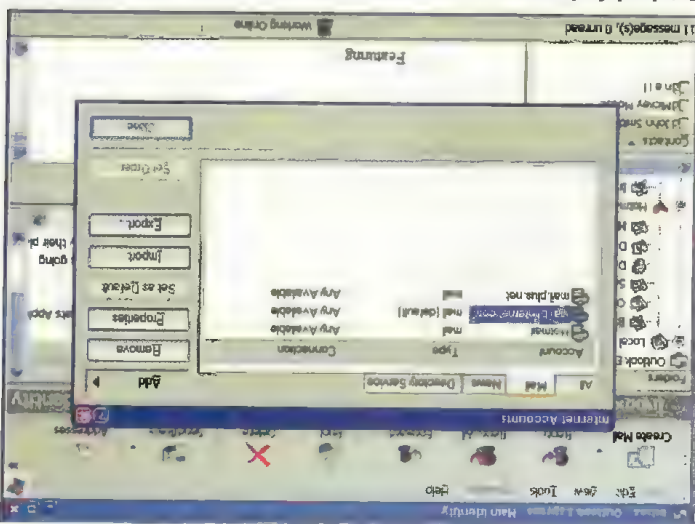

You can find the answer to most Windows problems in Microsoft's online Knowledge Base

System Restore is the solution to many problems and it restores a previously good working state

Forgotten your password? Log in using a different account and change it with this tool

Set the default account to use when sending emails. It must match your ISP

need to download a patch from the Microsoft website. Go to <http://support.microsoft.com> and enter '816506' into the search box to find the file.

Hotmail hiccup

Outlook Express can be configured to access your Hotmail account for sending and receiving email. If you do this, but get an error message like, "Unable to poll for new messages on your HTTP server," it means that your privacy settings are too high in Internet Explorer. In the Privacy tab, click the Edit button and in the Address of website box, enter www.hotmail.com. Click the Allow button then close the dialogs.

Disabled hyperlinks

If you receive an email that contains hyperlinks, but nothing happens when you click the blue underlined text, then you need to re-register some files. Click Start/Run and enter each of these commands one at a time: `regsvr32 urlmon.dll`, `regsvr32 shdocvw.dll`, `regsvr32 browseui.dll`, `regsvr32 msjava.dll`

Errors in messages

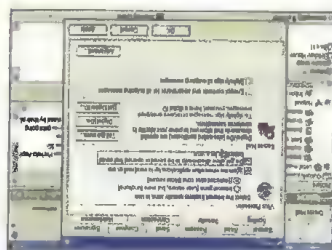

If you try to open an email and an error message says, "There was an error opening this message. An error has occurred," it might be due to McAfee VirusScan. If you have an old version, it is not fully compatible with Outlook Express 6 so you need to upgrade to the latest one. Go to www.mcafee.com.

"THERE WAS AN ERROR OPENING THIS MESSAGE"

enter '256219' into the search box to see a full description of the procedure.

Inaccessible attachments

If you have installed Service Pack 1 for Windows XP and cannot access email attachments, it is because Outlook Express considers them dangerous. You can disable this feature, but you need to ensure that you are protected with anti-virus software. In Outlook Express, select Tools/Options and go to the Security tab. Clear the tick next to Do not allow attachments.

This security option catches a lot of people out because it removes email attachments

Bugs and errors

There is a bug in Outlook Express 6 included with Windows XP Service Pack 1 and you may see an error message that states, "Outlook Express has encountered a problem and needs to close." If you look at the cause of this error, the files `msimn.exe` and `mshtml.dll` are listed. If this happens, you

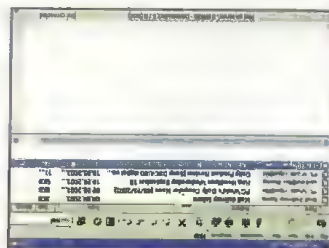

Outlook Express

Can't send emails

After switching to a new ISP, you may discover you can no longer send emails and an error message is displayed. This is because you can only send email through the ISP you are connected to. Run Outlook Express and select Tools/Accounts. Select the email account for the ISP you use and click Set as Default. If you do not have an account with your ISP, use the Add button to add a mail account.

Email frozen

When you run Outlook Express to fetch your email, it can appear to lock up if someone has sent you a message with a large attachment. The solution is to use an email program that can read the headers on the server and delete messages without downloading them. Download a free copy of Popcorn from www.ultrafunk.com/products/popcorn/. This requires no installation, but you do need to enter your email server address and password. Once you have done this, click the red Inbox icon to list the emails on the server. Tick the one blocking your Inbox and click the Delete icon. You can now use Outlook Express to fetch the rest of your email.

If Outlook Express freezes when fetching messages, the cause could be a large email. Use Popcorn to delete it

Upgrade problems

If you get an error message like, "Outlook Express could not be started because MSOE.DLL could not be loaded," it is probably because of an incomplete upgrade that has resulted in a mixture of old and new files. If there is a newer version of Internet Explorer available, then download and install it because this will overwrite the old Outlook Express. It is best if you remove the old version, but this is a complicated process. Go to <http://support.microsoft.com> and

Next. Windows will shut down and restore the previous configuration.

Sticky tooltips

The tooltip windows in the System Tray should be removed automatically, but if you have problems with part of them sticking on the screen, you should turn off the fade effect. Right-click an empty area of the desktop and select Properties from the menu. Go to the Appearance tab and click the Effects button. Clear the tick against Use the following fade effect for menus and tooltips.

Disk cleanup lockups

If you run Disk Cleanup and it locks up, there may be a corrupt file in the Windows Temp folder or Internet Explorer cache and you manually need to delete it. Click Start/Run and enter '%temp%' to open an Explorer window showing the contents of the Temp folder. Press Ctrl+A to select all the files then press the Delete key. A file that is currently in use can't be deleted, but you can remove everything else. Then double-click Internet Options in the Control Panel and click Delete Files on the General tab. Tick Delete all offline content.

Corrupt files in the Temp folder can cause Disk Cleanup to lock up at this stage

Can't defragment

Disk Defragmenter may display a message like, "Drive's Contents Changed: Restarting..." and the program never finishes. There are two solutions and you can either perform a clean boot or boot up in Safe Mode. To enter Safe Mode, tap the F8 key a few times when Windows starts to load. When you get to the screen that lists the startup options, are asked for the administrator password, press Return if it is blank, or enter it if you have set one. When the desktop appears you can run Disk Defragmenter. See the box on page 13 for details on performing a clean boot.

There's much more to CD authoring than show you how to get the most from your disc-burning hardware

Advanced CD creation

Over the past 10 years, the digital storage arena has changed dramatically. Turn back the clock to the early 90s and the only portable means for storing files were tremendously limited floppy disks and – for the more fortunate or well off amongst us – more bulky backup and storage devices such as tape drives and Zip disks. Eventually, writable CD drives and media were introduced to desktop PCs and the whole nature of computing changed. Initially, writable CD drives were incredibly expensive and were only used by those with a real need to author discs, true gadget-lovers for whom money is no object, and software pirates. As prices have fallen – both in terms of the drives themselves and the writable discs accompanying them – CD authoring has become accessible to all, and CD-Rs

are fast replacing floppy disks as the standard storage and backup medium. In fact, with DVD media constantly on the rise, the standard CD-R could soon be replaced as the most popular backup method, but there's plenty of life left in the old media yet. Almost all new PCs sold come with a CD writer fitted as standard, and even for those who don't own such a device, CD writers are often a high priority on the upgrade list. The low price of CD-R discs (particularly when bought in bulk), coupled with their high capacity and convenience, have made them a popular way of backing up vital files or sending large documents to friends or colleagues, but CDs are capable of much more than just data storage. No doubt you've already used your CD writer to create audio CD compilations and perhaps even

VideoCDs. However, there is so much more that can be done with your drive and a few blank discs. There is a wide variety of tools available that make it easy to create much more varied and imaginative CD-based projects. You can create an autorunning presentation, for example, or build an interactive menu system to aid navigation through a disc's contents. You don't even need any programming experience either, as a lot can be achieved using the right programs. Over the course of this article, we're going to explain how to get more life from your humble CD burner. Whether it's creating CD-based photo albums, constructing menus or getting better performance from your drive, we have all the know-how – and essential utilities – you need.

Windows XP PowerToys

Microsoft has released a PowerToy for Windows XP that can assist in creating CD-based slideshows. This tool is not provided with Windows XP itself and needs to be downloaded from www.microsoft.com/windowsxp/powerToys.asp, where you'll also find a range of other useful tools. Select CD Slide Show Generator and once downloaded, double-click the file to install it.

Once installed on your system, the CD Slide Show Generator option will be available whenever you attempt to write a group of image files to a CD using XP's built-in CD-burning tool. The CD Writing Wizard will give you the option of adding an autorun picture viewer to the disc, which operates in a similar way to the picture slideshow option in Windows XP, with the added advantage that it autoruns and will operate on any Windows system.

The XP PowerToys CD Slide Show Generator is simple yet effective

By using a simple directory structure and a collection of image and text files, you can create a slideshow

PhotoPlayer Plus has an excellent array of slideshow creation options to help you customise your project

same approach. Once the pieces are all in place, you need to burn the directories and program files to a CD using your usual CD-burning application.

A more complex and involved program for creating slideshows is Unidream PhotoPlayer Plus. This is a packed program that can be used as a powerful image viewer and organiser, and is capable of building an contained within the program's directory

and you can make as many copies as you like for backup (in case of disc error, damage or loss) and to share with family and friends.

PhotoCDBrowser is a simple and easy-to-use program that doesn't even require the use of a standard graphical interface. Instead, PhotoCDBrowser operates by accessing pictures placed into the relevant folders

We'll begin our tour of the many varied CD-R projects available with your photo collection. Almost everyone has an album or two tucked away in a bottom drawer or hidden in the attic, and few are given the pride of place such cherished memories deserve. If you're the proud owner of a digital camera then displaying your pictures properly may be even more of a problem. The chances are your pictures are gathering digital dust in a folder on your hard drive where no-one, other than yourself, is likely to see them.

Power presentations

Another possible use for the humble CD-R is creating disc-based presentations. We've covered the likes of slideshows, but suppose you want to create a business proposal, or need to demonstrate something to others. Microsoft's PowerPoint is one of the most popular programs around for this type of media, with businesses and organisations around the world using it in meetings and demonstrations. You could mock up a PowerPoint-style presentation using custom images and a slideshow program as seen on the previous page. But why struggle to

autoplaying image CD. This CD will launch the PhotoPlayer browser from which you can access all of the slideshow applications is easy: from the main program, select the Create Autorun CD option, create a new folder and drag the images you want to include on the CD over to the relevant folder. You can also add music if you wish. Once the files are copied over, burn the contents to a CD, and

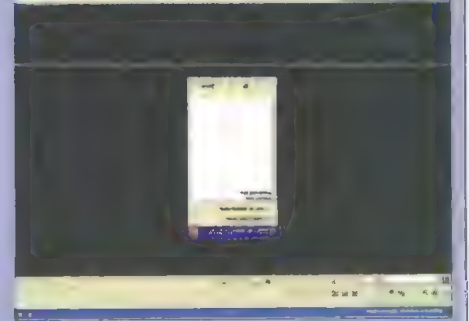

structure. As well as copying the images, you can also add a text heading, which will appear under each photo in the show. To do this you need to create a new text document named after the image. So, if the image in question is called London.bmp, then the text file should be called London.txt. Type the text you want to appear into the text file and save it. You can also add sound effects or music to the proceedings by using the

backed up safely. Whilst it's perfectly possible to back up digital pictures, or scanned in film prints – onto CD-R discs, there's a lot more you can do with the right tools. For example, you can create your own rolling or interactive slideshow that can be played on any system – a great way of showing off your holiday snaps or remembering your wedding day. Your photos will stay in a perfect condition,

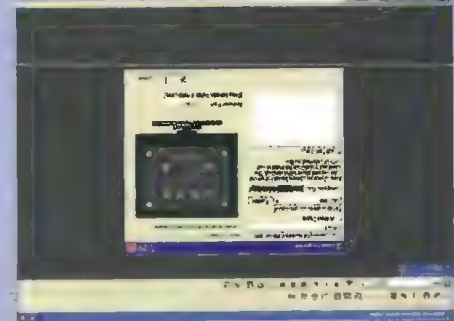

“YOU CAN CREATE YOUR OWN ROLLING OR INTERACTIVE SLIDESHOW SYSTEM – A GREAT WAY OF SHOWING OFF YOUR HOLIDAY SNAPS”

Digital photo albums

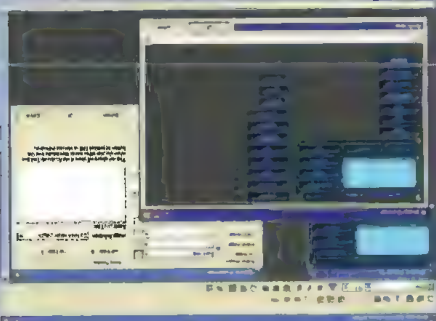

1 install the program onto your system then browse to the directory and open the Maestro editing program (the file is called *MasterEd.exe*). You'll be given the choice of creating a new menu or editing an existing one. Choose the new option to begin creating a new menu.

2 For this guide we'll keep things simple and use the program's existing background and buttons. First though, we need to select the menu position. Choose the required option and enter in the name of the new menu. If you want, enter some text into the custom text window.

3 Now, click on the New button icon on the top command window. This will open the various different button states (up, down etc) by clicking on the browse button and selecting the right graphic from the new dialog box.

Use Autorun Maestro

If you don't have a copy of PowerPoint, or if you the option of starting the slideshow, and the PPPCD window will appear giving you the option of starting the slideshow. Once the disc is written, place it into a system .exe file and autorun.inf is already set up. has all of the folders already laid out and the burned onto a CD-R. This directory structure files into a directory structure which is then .program. Instead, you place the required don't use any form of GUI to manipulate the (page). Like the slideshow software, you similar way to PhotoCDBrowser (previous in the CD and you're away. PPPCD works in a need to proceed with the presentation, slip complete with an autorun facility. When you burn existing PowerPoint files onto a disc, PPPCD is a program that enables you to based version? recreate an existing PowerPoint presentation when it's possible to create a disc- have a presentation already created, you'll no doubt want to find another option. CDFrontend Lite is one such choice. This is a powerful authoring program that lets you create your own presentation using the included range of tools. You can place text and images onto the pages of the project This makes the program excellent for presentations, and a much better way of getting your message across than still images. Using the program is a little more complicated than a lot of other programs of a similar type, but this is to be expected given the scope of possibilities open to you. Once you've gone through and laid out each page of the project, you can burn the final creation to CD, which can then be run on other systems. Adding video and music isn't difficult either, and consists of dragging and

Create your own PowerPoint-style presentations from scratch with CDFrontend Lite

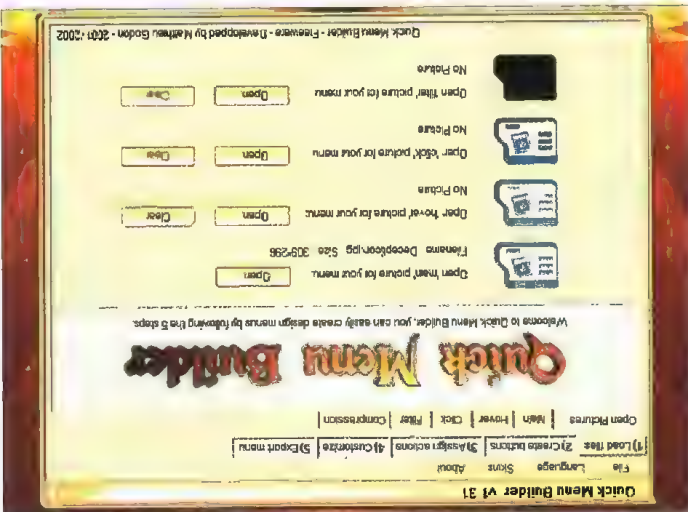

If you've got PowerPoint presentations that you need to take with you, create autorun CDs with PPPCD

MediaMenu can be used to create your own custom full-screen menus for your CD creations

Quick Menu Builder is one of the best menu creation programs available and is a breeze to use

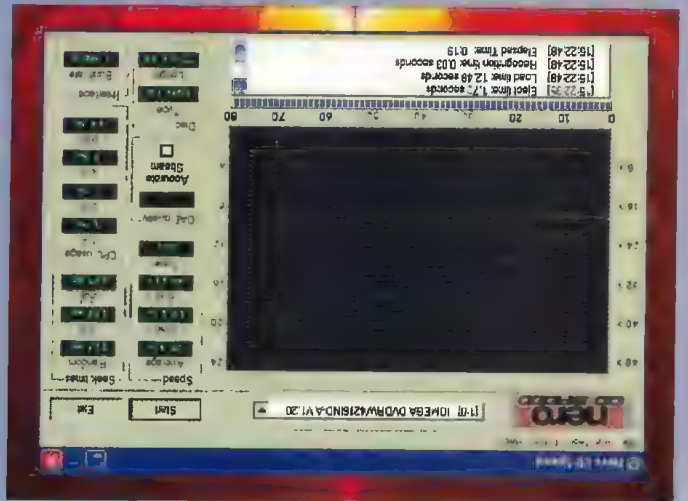

dropping items into place. You can also give items hyperlinks to enable connections to relevant websites. For security purposes, each individual page in the presentation can be assigned a password, which is requested upon opening a page (this feature is only available in the pro version, however). your CDs much easier, but they can also add a high level of professionalism to a disc.

Menu manipulation

Getting the most out of your CD burner isn't just about the things that you can do with it; it's also about the performance of the device. If you've got an old drive, you may start to notice the writing speed degrading over time, or you may start to produce a higher volume of corrupt CDs. For this reason, it's a wise idea to regularly test your drive's performance to highlight any possible errors.

Nero CD Speed is a small tool that can be used to check your drive and CDs for any problems. It can run a full

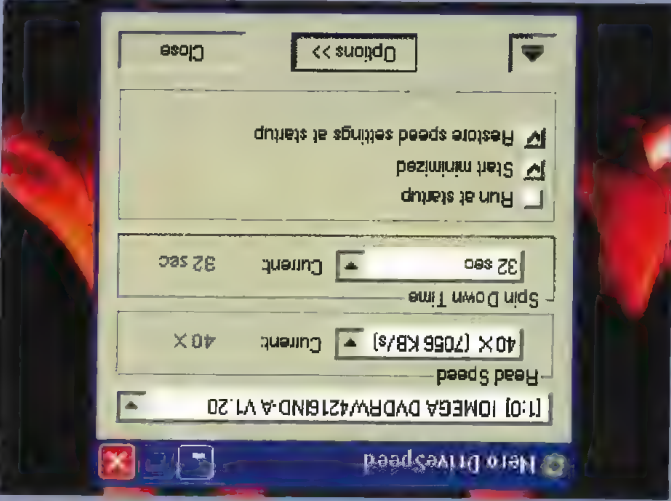

Using Nero CD Speed, you can check your CD drive and individual CDs for any problems

selection of speed tests on the various drive functions (such as seek times and CPU usage), and can also check CDs for any corrupted sectors and data.

Another CD-checking program is the appropriately named CDCheck. This, like CD Speed, can run a series of checks on your CDs and will report any errors it encounters. As well as the scanning aspect, CDCheck can also compare files and folders and perform special CRC tasks. Should you have any corrupted data, you can even use the rescue option in an attempt to retrieve the lost data.

Nero DriveSpeed is a small app that lets you limit the speed of a drive. Why would you want to do this? Well, although a lot of drives around at the moment let you write at high speed, they can be noisy and are sometimes more prone to errors (often depending on the quality of the discs being used). DriveSpeed lets you select a maximum writing speed for the drive, hopefully cutting down on any errors and possible CD noise. DriveSpeed runs in the System Tray and can be used to adjust the drive speed at any time.

If you've got a noisy CD drive, or keep getting write errors, try reducing the maximum speed

to go and learn a whole programming language in order to create a CD menu, but there is an alternative.

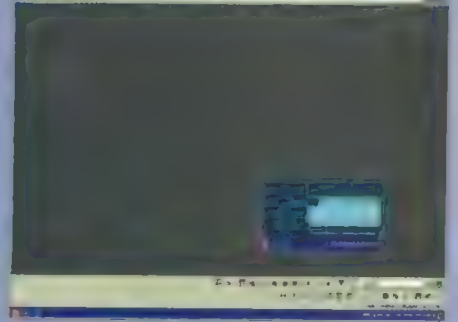

Quick Menu Builder is an easy-to-use application that lets you create your own menus for use on your discs. Using the tabbed interface, select the images you

wish to use for the backdrop of your menu and then create the buttons you require, assigning actions to each one. This is all done via the straightforward menu system, and there's no need for any coding whatsoever. Selecting the actions for buttons is simply a case of choosing the relevant

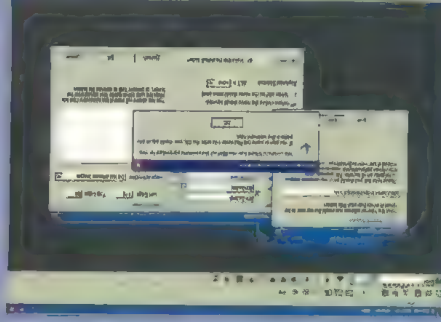

option from a drop-down menu. You can even set up different button sounds and rollover states.

MediaMenu is another option, although this requires greater input from the user, and is more complex. You can create a full-screen menu, complete with custom images, text

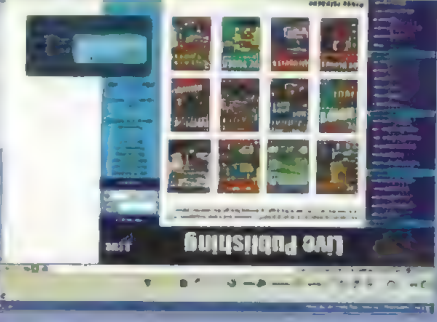

4 Click OK to finish the button then use the mouse to drag it to the desired area of the screen. If you need help positioning the button, select either the guide 'one option or the button flash option, which flashes the button to make lining it up with the background easier.

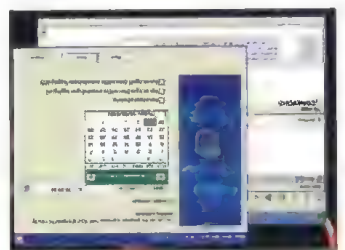

5 Now, right-click on the new button and the configuration box will open up. We'll make a Web link Go to an Internet Site. Set it to stay on screen and then enter the hyperlink in the supplied box. Click OK and the button will be built.

6 Create as many buttons as you need in the same way, selecting the various options. Rename the file to Maestro.exe and include the required files (see the program's readme file) on the root of your CD. Once burned, the menu should autorun on insertion of the new disc.

WINDOWS

Make the most of your CD writer and ensure that you never lose valuable data

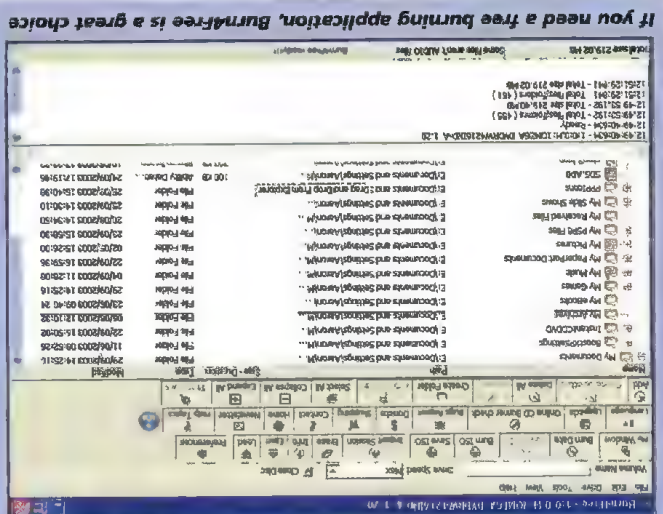

creator that can be used to create menus for your CDs. These menus can contain a range of different buttons, all with various states (such as rollover, pressed etc). You can also configure the various buttons to perform different tasks. Specific programs can be launched, websites can be opened and you can open and view documents. There's even a small window containing rollover text for each button. The program comes with an included autorun.inf file that references the menu and launches it when you insert the CD into the drive. For more information on Autorun Maestro, see our guide on the previous page.

Back up to disc

Getting the most from your CD writer doesn't necessarily mean using it to create multimedia projects or showing off your photos. You can also use it to ensure that you don't lose irreplaceable data. Backups are one of the most common uses of the

Burn for free

Most people will already have access to a CD-writing package of some form, as most new PCs and CD writers come with a bundled title. Ahead Software's Nero and Roxio's Easy CD Creator are the two most popular CD-writing applications around at the moment, but these are full-price programs. If you've bought a CD writer in a clearance sale, or second hand, it may not have any writing software at all. In this instance, the freeware scene is a great help, and there are a number of free CD-authoring alternatives available. Burn4Free is one such free alternative. (although only .wav files are supported).

Another option is CDBurnerXP Pro. Despite the name, this is a free burning application that can be used both in XP and other versions of Windows. It supports both standard CDs and re-writable discs. You can create both data and audio CDs (although only .wav files are supported).

Overburning

In simple terms, overburning means squeezing more data onto a disc than it is advertised as being able to hold. This is accomplished by utilising the area of the CD that's usually reserved for the Lead Out Data. This lets you get around the usual storage limit of 74 minutes, and lets you get a little more onto a blank CD-R. That said, it doesn't mean that you'll be able to get an extra one to five minutes. This may just be enough though, and may save you wasting another disc for a small amount of information. Overburning doesn't require any special hardware, although some drives are better at overburning than others. You may find that your current hardware can't perform overburning without errors, or

overburning smoothly. Please note however, that overburning is done at your own risk. It's common for overburned discs to be unreadable by some drives, and in some rare cases, overburned discs have been known to damage CD drives. In most cases though, you should have no problems, and most new drives around at the moment will perform

that can archive your files in a compressed BackupWin is another backup program with multiple CDs. will automatically split the data across turn your CD writer into a fully functional, automated backup system. This means that you can leave a CD in your writer, and the backup will take place automatically, with no

"WITH THE RIGHT SOFTWARE INSTALLED, YOU CAN TURN YOUR CD WRITER INTO A FULLY FUNCTIONAL, AUTOMATED BACKUP SYSTEM"

input needed from you (except a new disc when required). Handy Backup is a program that lets you do just this, and a whole lot more besides. It's a fully featured backup suite that lets you perform all sorts of backup tasks. Files can be backed up to another hard drive, across a network and, for our purposes here, onto CD-R. You can use the program to archive files to CD right away if you need to, or you can use the scheduling option to set up a regular backup task running at a specific time. Doing so is easy, and selecting the files and folders to be archived is a simple case of browsing to each item and selecting it. You can choose a level of compression to add to your

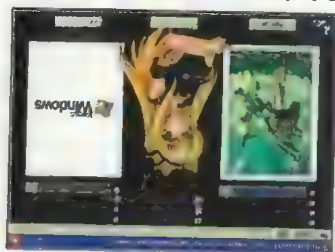

By selecting items to be included on the disc, and easily get the most out of your blank CDs. this space-saving problem, letting you quickly burn down the data so it does fit can be a problem. Burn to the Brim should help with onto it. This is an irritating problem, and trimming down the data you want to burn won't fit. It's a common problem when trying to burn a disc that the data you want to burn won't fit

Pushing the envelope

at a later date. used to extract files from an existing archive. The program can also be used to protect a CD. Compressed archives can be encrypted for a better level of protection in case you lose the disc and disc spanning is included. The program can also be used to extract files from an existing archive.

Printing out your CD case labels is a cinch with UnderCoverXP Pro and you even get guidelines when folding

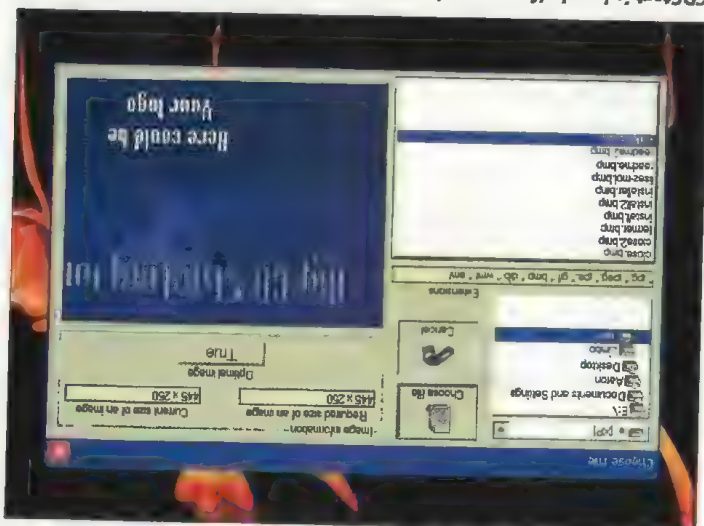

Label Creator 4000 does away with the range of options usually associated with this type of program. Creating labels is simple, and you only need to select an image for each different section (CD, front and back covers). Once an image is selected, you can choose to scale the image to the best fit with a single click. Text can be added to the project by making use of the included text tool. The program even supports the tiny mini-CD format. Printing CD case labels can be annoying at best, but with UnderCoverXP Pro, it's a cinch.

Label creation made easy: Label Creator 4000 is a simplified CD-labeling program

CDStart is handy if you need to create a simple autotune file for your CDs

WINDOWS

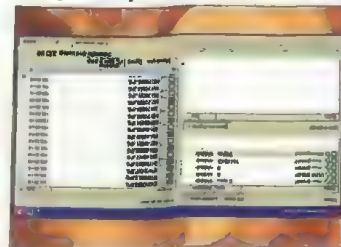

Most commercial CDs have a special feature that makes them start up as soon as you put the CD in the drive. This is the autotune - a feature that's commonly taken for granted. A lot of people assume that a CD will start up as soon as you put it in the drive, and if one doesn't, users often think the disc is faulty. This is all the more reason for any discs you

Autotune discs

both 74 and 80 minute discs.

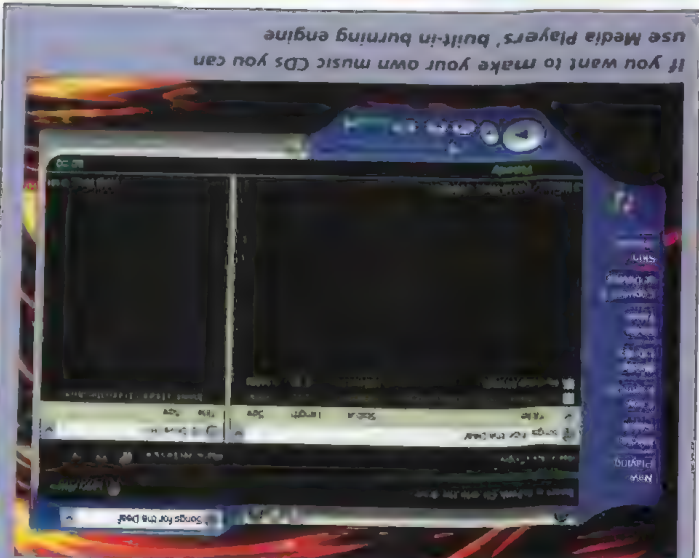

losing too much space. The program supports minimum possible usage out of each disc without through your data in order to get the maximum to the Brim will automatically sift needed. This isn't so special, granted, but the program will keep a tally of the space

are as crammed full as possible to make sure your CD-R discs Burn to the Brim can be used

CDStart is a small program that can be used to generate autotune files for your discs. These are the simple files found on CDs that communicate with Windows, telling the operating system which program to launch when the disc is inserted. Setting up an autotune file manually is fairly straightforward but with CDStart, it's an absolute breeze.

Another option is UF Autotune Creator, which can create an autotune link on a CD that will open up an .html file. All you need to do is select the file, choose a save path and you're done. This is especially useful if you need to demo a new website to a potential customer, or want to create a site

Built-in burning

Users of Windows XP have the option of saving time and money thanks to the inclusion of a packet writing engine built into Windows XP. This means that you can open a blank CD within Windows Explorer and drag and drop items onto it just like you would a floppy. Once you're done, you can ask Windows to burn the CD using your installed CD writer. This is excellent for users of Windows XP. If you don't have the latest version of Windows Media Player, visit Microsoft's website (www.microsoft.com) to download it.

For this task, you can use Windows Media Player. This has an included CD-writing function that can be used to write your own music CDs, complete with track listing. If you don't have the latest version of Windows Media Player, visit Microsoft's website (www.microsoft.com) to download it.

Internet

A large proportion of home computers are now Internet-enabled and both Web browsing and email have become common pastimes. You may think you know your way round the Web quite well, but are you making the most of your Net connection? On this issue's packed DVD there are almost 600 Internet-related tools to help you do just that. As well as a massive number of browsers, Internet Explorer add-ons and privacy tools, we've also collected together a generous selection of email tools to help you sort your messages or overcome the menace of spam, and networking tools to put you in complete control of your LAN.

Mac Makeup	macmakeup153d.zip	294Kb	98/Me/XP/NT/2000	Free	Spoof your system's MAC address at will
MACView for Netware	macview.zip	230Kb	NT	Free	MACView for Netware displays
Moore's Proxy Checker	proxycheck.zip	14Kb	98/Me/XP/NT/2000	Free	Check proxy lists and servers for availability
Moore's Who's	whois.zip	33Kb	98/Me/XP/NT/2000	Limited trial	Grab domain name information with this tool
MSN Sniffer	MSnSniffer_trial_setup.exe	7.5Kb	98/Me/XP/NT/2000	Limited trial	A handy network control utility for Windows that records MSN conversations
Name2IP2Mac	Name2IP2Mac.zip	166Kb	98/Me/XP/NT/2000	Free	Convert computer names into IP or MAC addresses and vice versa
Net Explorer Pro	netexplorer.zip	664Kb	98/Me/XP/NT/2000	Limited trial	Search your LAN for working computers
NetGraph	NetGraph	204Kb	XP/2000	Free	A realtime network monitoring tool

Utility name	File name	File size	System	Notes	Description
NetMonitor	frmp.exe	855Kb	98/M/XP/NT/2000	Free	Calculate your Internet connection speed
NetScope	SetupNetScopeN.exe	1,000Kb	98/M/XP/NT/2000	Free	Monitor network usage, test speed and find spyware
Netstat Live	nsli.exe	257Kb	98/M/XP/NT/2000	Free	Continually scan your network to keep track of when users switch their PCs on and off
Netstat Viewer	NetstatViewer.zip	276Kb	98/M/XP/NT/2000	Free	An easy to use TCP/IP protocol
Network Assistant	naszi.zip	1,090Kb	XP/NT/2000	Limited trial	A handy GUI replacement for the standard console-based input for Netstat
Network Messenger	NetMsg.zip	1,530Kb	98/M/XP/NT/2000	Free	Simple network messenger tool
Network Password Changer	PasswordChanger.exe	409Kb	98/M/XP/NT/2000	Free	Change passwords on multiple computers
Network Probe	NetProbe 0.3-install.exe	2,500Kb	98/M/XP/NT/2000	Free	Identify and isolate traffic problems
NS-Batch	nsb32-6e.zip	904Kb	98/NT	Free	Perform NIS lookups to identify IP addresses
NU75	NU75.EXE	908Kb	98/M/XP/NT/2000	Free	Display the IP addresses and configuration details of all the systems on your network
OddGravity Network Info	NetworkInfo_Setup.exe	335Kb	98/M/XP/2000	Free	Make email available on every PC on a network
Office Mail	om_inst.exe	826Kb	98/M/XP/NT/2000	Free	Identify the country of origin of an IP address without being connected to the Internet
Offline IP-Location	IPLocate_Setup.exe	376Kb	98/M/XP/NT/2000	Free	Easy-to-use packet sniffer program for Windows
PacketMon	pmon.exe	184Kb	XP/2000	Free	Use a secure SSH connect on for monitoring networks
Ping	Ping.vbs.asp.zip	500Kb	98/M/XP/NT/2000	Limited trial	See if a host is reachable with this program
Ping-O-Meter	pingometer_1.5.exe	1,310Kb	98/M/XP/NT/2000	Free	Ping other computers with this program
PingPlotter	ongpic_2.exe	840Kb	98/M/XP/NT/2000	Limited trial	A intuitive graphical network troubleshooting program
Placeholder Remote Control	pdnsrm32v115.exe	1,420Kb	98/M/XP/NT/2000	30-day trial	Access your PC remotely via an Internet browser
Port Invader	portnav.exe	2,579Kb	98/M/XP/NT/2000	Limited trial	Scan a range or a list of IP addresses
PortLocker	pblocki.exe	229Kb	98/M/XP/NT/2000	Free	Log unauthorized port access attempts with this program
PortMapper	ppmapent.exe	229Kb	98/M/XP/NT/2000	Free	Map any TCP/UDP port with this handy tool
PortPeeker	PortPeeker.zip	481Kb	98/M/XP/NT/2000	Free	PortPeeker is a standalone port listener that logs whatever TCP/UDP port you specify
Proxy+	ppplu_us.exe	918Kb	98/NT/2000	Free	Share Internet access across a LAN
Putty	putty.exe	364Kb	98/M/XP/NT/2000	Free	Run remote commands
Remote Command	RmtCmdGUI.zip	37Kb	98/M/XP/NT/2000	Free	Reboot or shutdown a computer on a network
Remote Reboot	reboot.zip	48Kb	98/M/XP/NT/2000	Free	Reboot your computer remotely
Remote Shutdown mtl	remshd.exe	124Kb	98/M/XP/NT/2000	Limited trial	Remote shutdown power of a computer on a network
RemoteShutdown	remshd_n.exe	115Kb	98/M/XP/NT/2000	Free	Make repetitive connection testing simple
RoboTest	Rbtst02.zip	843Kb	98/M/XP/NT/2000	Free	Advanced Internet computer power management program
RSNUT Pro	rsnut.zip	534Kb	98/M/XP/NT/2000	Limited trial	An integrated network query tool
Sam Spade	spade114.exe	1,802Kb	98/M/XP/NT/2000	Free	Enable file transfer pausing and resuming over a local network
Secure Copy 2	sc2setup.exe	2,029Kb	98/M/XP/NT/2000	Free	Send and receive strings to or from TCP or UDP servers
ServerTalk	ServerTalk.exe	120Kb	98/M/XP/NT/2000	Free	A real time Windows share watcher
SIT	sit.zip	20Kb	NT	Free	Start and stop services on Windows NT
SmartSchedule	schedule.zip	20Kb	NT/2000	Free	Amend the tasks scheduled on an NT/2000 machine
SNMP File Sniffer	snb.zip	1,340Kb	98/M/XP/NT/2000	Limited trial	Log SMB file operations, and intercept files transmitted via LAN
Sniffere	Sniffere.exe	38Kb	98/M/XP/NT/2000	Free	A network sniffer program for Windows
SNMP4PC	SNMP498.zip	120Kb	98/M/XP/NT/2000	Free	A simple network program for Windows
SoftFox LAN Messenger	messenger.exe	1,340Kb	98/M/XP/NT/2000	Limited trial	Send messages securely via your LAN
Spike	Spike500.exe	139Kb	98/M/XP/NT/2000	Free	A utility bundle with block scanning capabilities
Switch	switch.exe	542Kb	98/NT/2000	Free	Monitor your printers, servers etc. Receive email when they're down
TCPSpeed	tcpseed.zip	375Kb	98/M/XP/NT/2000	Free	Measure the bandwidth of your Internet connection
TightVNC	tsrvcpl_instal1_src_bin.exe	550Kb	98/M/XP/NT/2000	Free	Telnet client controlled by VB script
TightVNC	tgtrvc-1.2.8-setup.exe	860Kb	98/M/XP/NT/2000	Free	View and control remote computers - designed for slower networks
TJPing	tping.zip	783Kb	98/NT	Free	Perform ping and trace route commands
Trace3D	TRACED3D.EXE	608Kb	98/M/XP/NT/2000	Free	Trace the route from one machine to another or even a website
TrailMaster	TrailMaster4.exe	1,790Kb	XP/NT/2000	Free	Monitor all of the TCP/IP traffic taking place over your network
Tray Ping	trayping150.exe	969Kb	98/M/XP/NT/2000	Free	A Windows ping utility for your network
Trusted Messenger	tmv2.exe	1,004Kb	98/M/XP/NT/2000	Limited trial	Effective chat tool for the whole office
Ultima Port Scanner	ultima port-scanner.exe	1,450Kb	98/M/XP/NT/2000	Limited trial	Quickly scan both remote and local ports
Ultima Traceroute	ultma-traceroute.exe	860Kb	98/M/XP/NT/2000	Free	Converts and IPHost into a server using traceroute
Virtual Network Computing	vrnc-4.0b4-x86-win32.exe	563Kb	98/M/XP/NT/2000	Free	View and operate a computer from a remote PC anywhere on the Internet
Visual Ping Monitor	PingMon154.zip	244Kb	98/M/XP/NT/2000	Free	Simple ping tool that displays results graphically
VisualSniffer	VisualSnifferEDTU.zip	1,539Kb	98/NT/2000	Limited trial	Trace the route of your IP packet on a map of the world
VNC Admin Console	vrncac_1.5.exe	3,100Kb	98/M/XP/NT/2000	Limited trial	Perform protocol analyses
Webslower	Webslower.exe	835Kb	98/M/XP/NT/2000	Free	Manage your VNC connections into different groups
WhoOpen	WhoOpen12.zip	614Kb	XP/NT/2000	Free	Test different connection speeds on your network
WinMTR	winmtr_bin.zip	133Kb	98/M/XP/NT/2000	Free	Identify who has opened files and closed them
WTSGateway	wtsgateway_setup.exe	796Kb	98/M/XP/NT/2000	Free	A Windows done of Mats's traceroute
ZNetWatch	znetwatch101.exe	280Kb	98/M/XP/NT/2000	Limited trial	Acts as a gateway for both RDP and Citrix ICA
Zx Sniffer	ZxSniffer.exe	283Kb	98/M/XP/NT/2000	Free	Quickly see which computers on your network are eating bandwidth

Security & antivirus

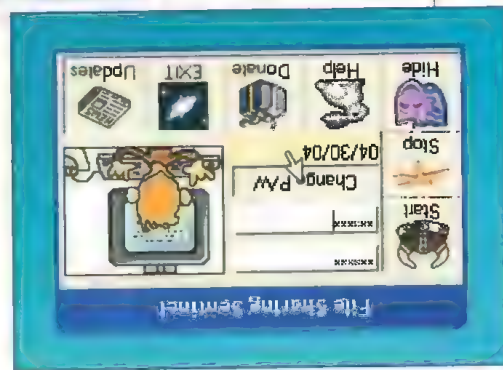

Whether you're permanently connected to the Internet via a broadband connection, or you never hook up to the Web at all, PC security is a vital concern that simply can't be ignored. Between viruses, hackers and unauthorised users logging on to your PC, it pays to take precautions to secure your data and your privacy. In this section, we've brought together over 300 tools to help you do just that. Whether you want to protect your system against viruses or keep your children safe whilst browsing online, we've got a tool for your every need.

AB-Coder	Coder2.exe	2,340Kb	98/M/x/P/N/T/2000	Limited trial	Password security program for Windows
AbsoluteShield File Shredder	fileshredder.exe	509Kb	98/M/x/P/N/T/2000	Limited trial	Encrypt files using one of the three secure encryption algorithms
Account Denied	acofr_211_setup.exe	547Kb	98/M/x/P/N/T/2000	Limited trial	Recover passwords for files created using MFS Office 95/98/2000
Access List	AccessDenied340.exe	529Kb	98/M/x/P/N/T/2000	Limited trial	Block unauthorised users from accessing your system at boot time
Accurate Popup Killer	popupkiller_setup.exe	438Kb	98/M/x/P/N/T/2000	Free	Provide a convenient method for storing passwords
Access Password vault	apsetup.exe	1,000Kb	98/M/x/P/N/T/2000	Free	Kill both Internet Explorer and Windows Messenger pop-ups
ActiveScreenLock	ActiveScreenLock.exe	760Kb	98/M/x/P/N/T/2000	Free	Keep others from entering your computer
Actual Spy	actualspy.exe	850Kb	98/M/x/P/N/T/2000	Limited trial	Activity Monitor monitors usage of networked computers remotely in real time
Ad-aware	aaaw181.exe	2,101Kb	98/M/x/P/N/T/2000	Limited trial	Monitor the events that take place on your computer - logs key presses and takes screenshots
Advanced Anti Spy	advanced-anti-spy.zip	481Kb	98/M/x/P/N/T/2000	Free	Scan your memory and registry for ad-supported software components
Advanced Cypher	adv-cypher.zip	791Kb	98/M/x/P/N/T/2000	Free	A powerful anti-spy tool for Windows
Advanced EFS Data Recovery	aefsdr.zip	883Kb	98/M/x/P/N/T/2000	Limited trial	Decrypt or encrypt the text that you input into the program
Advanced Email Monitoring	advanced-email-monitoring.zip	368Kb	98/M/x/P/N/T/2000	Free	Monitor email activities with this program
Advanced Inuit Password Recovery	aiuprx20	838Kb	98/M/x/P/N/T/2000	Limited trial	Recover lost or forgotten passwords with this tool
Advanced Keylogger	advanced_keylogger.exe	917Kb	98/M/x/P/N/T/2000	Limited trial	Record every keystroke to an encrypted log
Advanced Mailbox Password Recovery	ambp.zip	461Kb	98/M/x/P/N/T/2000	Limited trial	Recover login and password information
Advanced Office Password Breaker	oapb.zip	589Kb	98/M/x/P/N/T/2000	Limited trial	Decrypt Office passwords
Advanced Password Generator	apgz.zip	152Kb	98/NT/2000	Limited trial	Generate random passwords to save you thinking them up!
Advanced Password Keeper	SetupPAK45.zip	984Kb	98/M/x/P/N/T/2000	Limited trial	Store and edit password information with this program
Advanced Windows Password Recovery	awpr.zip	722Kb	98/M/x/P/N/T/2000	Free	Recover logon and screensaver dial-up programs
AI/PA	aia32ee_386.exe	1,200Kb	98/NT/2000	Free	A program that tells you about your system
Air EYE Lock	ael.zip	1,120Kb	98/M/x/P/N/T/2000	Free	A utility password protected hard drive for Windows
Ally Secrets	ally30.zip	329Kb	98/M	Free	Keep all your passwords safe
All-In-One Secretmaker	secretmakersetup.exe	873Kb	98/M/x/P/N/T/2000	Free	Protect your privacy and security with these great tools
AmiSoft Password	amiapass.zip	713Kb	98/M/x/P/N/T/2000	Limited trial	Create, organise and protect your passwords for a secure system
Amnihilator	Amnihilator.zip	611Kb	98/M/x/P/N/T/2000	Free	Add a right-click menu to the Recycle Bin
Anonymous Privacy Analyzer	pamdr103.zip	368Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Antidumaru	Antidumaru-ENL.exe	57Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
AntiFirewall Anonymizer	antfwi.zip	399Kb	98/M/x/P/N/T/2000	Limited trial	Free a right-click menu to the Recycle Bin
AntiFuzzer	AntiFuzzer-en.exe	60Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
AntiGarda Removal Tool	AntiGarda-en.exe	34Kb	98/NT/2000	Free	Free a right-click menu to the Recycle Bin
AntiGoner	AntiGone.exe	240Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Antiviral	Antiviral-en.exe	59Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
AntiKowBot	AntiKowBot.exe	100Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
AntiLogage	AntiLogage-ENL.exe	59Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
ArtiOpsaver Removal Tool	ArtiOpsaver-en.exe	54Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Antisven	Antisven-en.exe	59Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
AntiVirus Personal Edition	awwinfix.exe	3,740Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
AntiVirus 2004	avk2004trial.exe	16,600Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Any Password	apw.zip	536Kb	98/M/x/P/N/T/2000	30-day trial	Free a right-click menu to the Recycle Bin
Appasword	apw101.exe	1,250Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
AppAlarm	Saklabs_AppAlarm.exe	419Kb	98/M/x/P/N/T/2000	Limited trial	Free a right-click menu to the Recycle Bin
Ashtampoo Privacy Protector	ashtampoo_privacyprotector104_plus_se.exe	3,111Kb	98/M/x/P/N/T/2000	Limited trial	Free a right-click menu to the Recycle Bin
Asternik Key	asthniks_setup.exe	2,570Kb	XP/NT/2000	Free	Free a right-click menu to the Recycle Bin
Authentication	authkey.exe	292Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Auto Keylogger	Auto-Keylogger-setup.exe	70Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Avast! 4 Home Edition	setupeng.exe	7,608Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Avast! Virus Cleaner Tool	aswdrn.exe	336Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
AVG Antivirus	avg665fu_free.exe	6,550Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Avicrypt	Avicrypt-Setup.exe	813Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
Aye Parental Control	apc.zip	623Kb	98/M/x/P/N/T/2000	Limited trial	Free a right-click menu to the Recycle Bin
Bartware Personal Firewall	btwfirewall.zip	300Kb	98/M/x/P/N/T/2000	Limited trial	Free a right-click menu to the Recycle Bin
BCWipe	btwfirewall.exe	300Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
BitDefender Standard 7	bit_standard7.exe	536Kb	98/M/x/P/N/T/2000	Limited trial	Free a right-click menu to the Recycle Bin
Black Screen	black.zip	152Kb	98/NT	Free	Free a right-click menu to the Recycle Bin
bmpPacker	bmpunpacker.zip	1,210Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin
BooBlock	bbp.zip	64Kb	98/M/x/P/N/T/2000	Free	Free a right-click menu to the Recycle Bin

Utility name	File name	File size	System	Notes	Description
Bootwinder	bootwinder.zip	108Kb	98/NT/2000	Free	Protect yourself against boot viruses
Bulldoguard	Bulldoguard.exe	1,600Kb	98/Me/XP/NT/2000	Limited trial	Detect, track and report callers with this program
Callertip	clp.exe	375Kb	98/Me/XP/NT/2000	Limited trial	Keep a log of what websites are accessed on your system
Canary	canary.zip	759Kb	98/Me/XP/NT/2000	Free	Capture video from a webcam, TV tuner card or other sources
CapturePed	cp_setup.exe	476Kb	98/Me/XP/NT/2000	15 day trial	Encrypt your files with this program
CD-Lock	cdl.exe	476Kb	98/NT/2000	Free	Save all your IDs and passwords to encrypted files
Centricorp's WallSafe	WallSafe.exe	1,440Kb	98/NT/2000	Limited trial	Securely delete file data located in free disk space
Cleaner	cleaner.zip	137Kb	98/NT/2000	Free	Encrypt text using the Windows clipboard
ClipsSecure	clipssecure_12.zip	234Kb	98/Me/XP/NT/2000	Free	Protect your files with secure key-based encryption.
Cloak	CloakSetup.EXE	1.34Kb	98/Me/XP/NT/2000	Free	Keep tabs on what happens on your PC whilst you're not there
Codename Alvir	alsetup.exe	920Kb	98/NT/2000	Limited trial	Clean out your Internet cache and Web browsing history
Complete Cleanup	cleanup.exe	944Kb	98/Me/XP/NT/2000	Free	Take full control of cookie activity on your system
Cookie Selector	CookieCleanerSetup.exe	4,270Kb	98/Me/XP/2000	30-day trial	Use your webcam as a motion-sensitive security monitor
Crime Catcher	cc2_setup.exe	160Kb	98/Me/XP/NT/2000	Free	Encrypt your files using 128-bit encryption algorithms
Crunch	crunch_release_3.1.zip	2,350Kb	98/Me/XP/NT/2000	Free	Easy-to-use encryption application that creates encrypted vaults
Cryptainer LE	cryle.exe	206Kb	98/NT	Free	Encrypt your files to keep them protected with this shell extension
Cryptext	cryptext.exe	23Kb	98/Me/XP/NT/2000	Free	A good encryption program for Windows
Cryptit	Cryptit.zip	289Kb	98/Me/XP/NT/2000	Free	Securely encrypt files using this accessible encryption tool
CryptMages	CryptMages5.zip	4,005Kb	98/Me/XP/NT/2000	Limited trial	Encrypt files for secure transmission
Cryptock	cryptock.exe	923Kb	98/Me/XP/NT/2000	31-day trial	Create an encrypted drive that can only be accessed with a password
Cryptobackup 2003 PE	cryptobackup.exe2003std_setup.exe	407Kb	98/Me/XP/NT/2000	Free	Restrict access to your executable files by password-protecting and encrypting their content
CryptoLocker	CryptoLocker.zip	450Kb	98/Me/XP/NT/2000	Free	Encrypt your email messages
Cryptomailer Free	cmiffree41Den.exe	751Kb	XP	30-day trial	Encrypt text on your desktop or Pocket PC - requires the .NET framework
Cryptotext	Cryptotexttrial.zip	728Kb	98/Me/XP/NT/2000	Free	Protect your data by encrypting files with up to 2,048-bit encryption keys
Cryptulip	cryptulip2.exe	143Kb	98/Me/XP/NT/2000	Free	Eradicate all traces of the browser hijacking CoolWebSearch components
CWSHredder	CWSHredder.exe	340Kb	98/Me/XP/NT/2000	Free	Protect yourself from network intrusion
Cyber-Defender	install.exe	10Kb	NT	Free	A Windows NT domain password program
Cycle Password	Cyclepass.exe	441Kb	98/Me/XP/NT/2000	Free	See the password behind the asterisk with this program
DA Password Recovery Free	dapasswordrecovery.exe	580Kb	98/Me/XP/NT/2000	Limited trial	Remove sensitive information with this program for Windows
Dasher	Dasher 302.exe	2,670Kb	98/Me/XP/NT/2000	Free	Use encryption techniques to keep your files and folder secure
Datadestroyer	Datadestroyer.zip	4,830Kb	98/NT/2000	Free	Decrypt files from a cloak and data stealth user
Decrypt HD	decrypthd.exe	1,910Kb	98/Me/XP/2000	Free	Conceal and encrypt small files with this steganography-based security tool
Dounds's Steganography	StegSetup.exe	413Kb	98/Me/XP/NT/2000	Free	Secure your files using a range of encryption algorithms
DPCRPT	dpcrpt.zip	729Kb	98/Me/XP/NT/2000	Free	Scrub data from your hard disk
Drivescrubber	drivescrubber.exe	7Kb	98/Me/XP/NT/2000	Free	A secure file deleter program for Windows
dsDEL	dsdel.exe	8Kb	98/Me/XP/NT/2000	Free	A file scrambler that uses the XOR stream conversion
Dynamic Passwords	dynpass1.zip	21Kb	98/Me/XP/NT/2000	Free	A new way to generate, manage and recall passwords
Dynamic Passwords for Palm	DynPassFree.zip	710Kb	98/Me/XP/NT/2000	Free	A great file shredder program
East Tec File Shredder	etfsfree.exe	715Kb	98/Me/XP/NT/2000	Free	An easy file encryption program
EasyFreeWebCam	freecam.exe	4,120Kb	98/Me/XP/NT/2000	Free	Advanced webcam tool that offers motion detection, email alerts and much more - adware
EasyFreeWebCam	freecam.exe	595Kb	98/Me/XP/NT/2000	Free	A software utility for encrypting documents
Express Checksum Verifier	xcv.exe	269Kb	98/Me/XP/NT/2000	Free	Check the integrity of files with this checksum checker
EKG	EKG.zip	25Kb	98/Me/XP/NT/2000	Free	A simple yet powerful key generator
Encrypted Briefcase Personal	ebsetup.exe	1,770Kb	98/Me/XP/NT/2000	Limited trial	Hide folders and secure files with this program
EncryptedPad	EncryptedPad-1.01.exe	369Kb	98/Me/XP/NT/2000	Free	A secure text editor for creating, editing and sharing encrypted documents
Encript-It	EncriptIt.zip	24Kb	98/Me/XP/NT/2000	Free	Encrypt individual files or entire folders using symmetric encryption keys
Enigma Firewall	EnigmaFireWall.exe	3,66Kb	98/Me/XP/NT/2000	Free	Protect your computer from unauthorized intrusion and Net usage
Eq Privacy	eqp.zip	61Kb	98/Me/XP/NT/2000	Free	Be sure of the best security on your PC with this program
EraseR	EraseR57Setup.zip	750Kb	98/NT	Free	Erase files completely so they cannot be recovered
Essential NetTools	ent3.zip	1,630Kb	98/Me/XP/NT/2000	Limited trial	A multifunctional set of network utilities
ESTOP	estop330.zip	395Kb	98/Me/2000	30-day trial	Cut off a TCP/IP connection without having to drop your entire network connection
Evidence Eliminator	eliminator.zip	4,867Kb	98/Me/XP/NT/2000	Limited trial	Comprehensively delete evidence of all kinds of activity from your machine
Express File Encrypter	Encrypter.exe	317Kb	98/Me/XP/NT/2000	Limited trial	Encrypt files and programs
Faust	Faust.zip	918Kb	98/Me/NT/2000	Limited trial	Encrypt files with multi-choice questions
File Own Guard	fogetup.exe	1,300Kb	98/Me/XP/NT/2000	Limited trial	Protect your personal folders from using file sharing programs
File Secure Software	fhinst.exe	330Kb	98/NT/2000	Free	Lock files on your system with this program
File Sharing Sentinel	File_Sharing_Sentinel.exe	580Kb	98/Me/XP/NT/2000	Free	Prevent your children from using file sharing programs
FileVault	Fv27Setup.exe	882Kb	98/Me	Free	Protect your files with this secure encryption utility
Find n'Block Personal Firewall	fhbPWSetup.exe	809Kb	98/Me/XP/NT/2000	30-day trial	Protect your PC against intruders and Trojan viruses with this personal firewall
FileCrypt	fhinst.exe	4,239Kb	98/Me/XP/2000	Free	Self-testing encryption tool for creating robust, secure file archives
FingerPrint	FingerPrint_Setup.zip	614Kb	98/Me/XP/NT/2000	Free	Detect whenever a file on your system is changed
FireCrypt	fhinst.exe	58Kb	98/Me/XP/NT/2000	Free	Hide text inside images with this steganography tool

Utility name	File name	File size	System	Notes	Description
Free!ite	Free!ite.exe	1,160Kb	98/Mc/XP/NT/2000	Limited trial	Rapidly scan your system for viruses (this free utility finds viruses but doesn't get rid of them)
FirelogXP	FirelogXP_Setup.zip	615Kb	XP	Free	Read the contents of the Windows XP firewall log
Firewall X-treme	FirewallX_Install.exe	1,000Kb	98/Mc/XP/NT/2000	Limited trial	Monitor your internet access with this firewall
FIVE	install_five.exe	600Kb	98/Mc/XP/NT/2000	Free	File integrity verification and encryption program
Fxyaha	Fixyaha.com	169Kb	98/Mc/XP/NT/2000	Free	Prevent the W32/Vahs/Emm virus from taking over your system
Folder Guard	FolderCryptThia112.zip	401Kb	98/Mc/XP	Limited trial	Protect Windows folders from accessing and viewing
Folder Lock	flock.exe	1,180Kb	98/Mc/NT	Limited trial	Protect files and folders on your system
Fp-Check	fpcheck-12.exe	572Kb	98/NT/2000	Free	Utility for the virus scanner F-Pro
F-Pro! Antivirus	fp-wrtl_trial.exe	7,200Kb	98/Mc/XP/NT/2000	30-day trial	Protect all your information against the threat of viruses
FreeCrypt32	fcrypt32.zip	143Kb	98/Mc/XP/NT/2000	Free	Allows you to encrypt your files with a password
FreeSecure Anti-Virus	fsav2003n.exe	6,383Kb	98/Mc/XP/NT/2000	30-day trial	Full evaluation version of the most reliable antivirus utility in this month's roundup
GoldTach	gt1612.exe	1,120Kb	XP/2000	Free	Compact personal firewall program that includes email protection
GoldTach Pro	gtpor.exe	1,970Kb	98/Mc/XP/NT/2000	Free	Protect your PC from hackers, Trojans and worms
Goodbye Spy	goodbye_spy_trial.exe	678Kb	98/Mc/XP/NT/2000	Limited trial	Remove spyware and adware files with this tool
GuardMax	gdmx15.exe	1,400Kb	98/Mc/XP/NT/2000	60-day trial	Secure your sensitive information with this guard tool
HardEncrypt	Hardencrypt.zip	66Kb	98/Mc/XP/NT/2000	Free	Encryption tool that boasts completely uncrackable encryption techniques
Hide Files and Folders	hidefolder_setup.exe	1,679Kb	98/Mc/XP/NT/2000	Limited trial	Secure your files and folders by hiding them
Hide in Picture	hdp21_en_nogif.zip	367Kb	98/Mc/XP/NT/2000	Free	Use the science of steganography to conceal information in an ordinary picture
HidePro	hidepro.zip	875Kb	98/Mc/XP/NT/2000	Limited trial	Encrypt and hide any type of files
HiJackThis	hijackthis.zip	125Kb	98/Mc/XP/NT/2000	Free	A general homepage hijacker detector and remover
History Cleaner	historycleaner.exe	326Kb	98/Mc/XP/NT/2000	Limited trial	Erase the tracks of your internet activity with this tool
hMSV	hmsv_setup.exe	2,277Kb	98/Mc/XP/NT/2000	Free	Create or check .sh and .mdf files to ensure that two copies of a file are identical
Ice Encrypt	ICEEncrypt.exe	200Kb	98/Mc/XP/NT/2000	Free	A simple file/folder encryption program
ICEWatch	icewatch.zip	98Kb	98/Mc/NT/2000	Free	Analyze your BlackICE Defender (firewall) logs
IE Internet Security	iesecurity.zip	830Kb	98/Mc/XP/NT/2000	Limited trial	Customize different settings
IE Privacy Keeper	iepk.exe	1,302Kb	98/Mc/XP/2000	Free	Remove all traces of your internet activity
IE Security Pro	iesecpro.zip	985Kb	98/Mc/XP/NT/2000	Limited trial	Customize many aspects of internet Explorer
ImageHide	imagehide.exe	1,085Kb	98/Mc/XP/NT/2000	Free	Disguise text within images with this program
Initiator Network Security Scanner	initiator.zip	1,320Kb	98/Mc/XP/2000	Free	Prevent your instant messaging conversations from being monitored
InJoy Firewall	ifire.exe	2,490Kb	XP/2000	Limited trial	Audit your network computer for possible access points
Internet Explorer Key	iekeyd.exe	721Kb	98/Mc/XP/NT/2000	Limited trial	Reset the Internet Explorer Content Advisor password
Internet Explorer Password	iepassword.exe	380Kb	98/Mc/XP/NT/2000	Free	Recover passwords to websites which Internet Explorer saves in its cache
Internet Security Manager	ismn.exe	918Kb	98/Mc/XP/NT/2000	Limited trial	Tools to retain and manage your Web browser
Internet PrivacyKit	ipksetup.zip	682Kb	98/Mc/XP/NT/2000	Limited trial	Take control and protect your computer
IRClean	irclean.exe	33Kb	98/NT	Free	Combat Internet Relay Chat (IRC) worms
Iron Key	ikkey.exe	702Kb	98/NT/2000	Free	Encrypt files and create self-extracting files
IsafeGuard Firewall	isafefw.msi	3,338Kb	98/Mc/XP/NT/2000	Free	Digitally sign your emails and files to ensure unauthorized users can't access them
Keepass	kpssetup.exe	550Kb	98/Mc/XP/NT/2000	Free	Put forgotten passwords behind you with this secure encrypted password manager
Key Folder	KeyFolder12.exe	363Kb	98/XP/NT/2000	Free	Securely manage your passwords and any other sensitive information
Keyboard Tracer	KTInstaller.exe	105Kb	98/Mc/XP/NT/2000	Free	Log what keys are pressed to monitor computer use when you're away
KeyMaker	keymaker_setup.exe	426Kb	98/NT/2000	Free	Generate secure passwords for use with any program or website
KeyWalllet	keywalllet.exe	1,420Kb	98/Mc/NT/2000	Free	Keep track of your website login passwords
KFSensor	kfsensor10.exe	925Kb	98/Mc/XP/NT/2000	Limited trial	Stop worms, hackers and Trojans with this security program
Kill2Me	kill2me.zip	13Kb	98/Mc/XP/NT/2000	Free	Remove all versions of the LockMe spyware component from your system
Lock Folder XP	lockfldr.exe	516Kb	98/Mc/XP/NT/2000	Limited trial	Protect your important data using a password
Lock It Xpress	lock.exe	112Kb	98/Mc/XP/NT/2000	Free	Lock folders for security and privacy
Lock My PC	lmcrcp.zip	796Kb	98/Mc/XP/NT/2000	Limited trial	Lock your computer when you leave it unattended
Lock O'Clock	LOCSetup.exe	337Kb	98/Mc/XP/NT/2000	Free	Protect your system with another password – not just your Windows login one
Lockbox	lbin320.exe	933Kb	98/NT	Free	A safe password storage utility
LockTight Security System	locktigh.zip	842Kb	98/Mc/XP/NT/2000	Free	Encrypt up to 10,000 files with this program for Windows
Logon Reminder	LogonRemindersSetup.exe	295Kb	98/Mc/XP/NT/2000	Free	A simple program to remember passwords
LogonAssistant	last1221.exe	838Kb	98/Mc/XP/NT/2000	Limited trial	Store all your usernames and password information in a single file
LogonReminder	LogonReminder.zip	177Kb	98/NT/2000	Free	Save yourself the embarrassment of forgotten passwords
MaxCrypt	MaxCrypt_v110.exe	1,001Kb	98/NT/2000	Free	Safeguard the contents of your computer
MaxPasswords	MaxPasswords.exe	350Kb	98/Mc/XP/NT/2000	Free	Create random passwords and generate password masks
Melare Removal tool	AntiMelare-EN.exe	60Kb	98/Mc/XP/NT/2000	Free	Protect yourself from the Melare virus
Microsoft Outlook Security	MSOS15.EXE	384Kb	98/Mc/XP/NT/2000	Free	A security add-in for Outlook
Message Encryptor	MSGEnc.exe	424Kb	98/Mc/XP/NT/2000	Free	Strong encryption for your data
Message Ad Blocker	message_ad_blocker.exe	552Kb	98/Mc/XP/NT/2000	Limited trial	Stop Windows Messenger pop-up messages
Messenger Key	msg/key.exe	279Kb	98/Mc/XP/NT/2000	Free	Easy-to-use tool to recover passwords from ICQ

Utility name	File name	File size	System	Notes	Description
Milnice	milnice.zip	64Kb	98	Free	Encrypt text files so that only the password holder can view them
MIRACRYPTON	miracrypton32.zip	181Kb	98/Me/XP/NT/2000	Free	Securely encrypt conversations in mIRC
Mouse Lock	ml.zip	141Kb	98/Me/XP/NT/2000	Limited trial	Prevent unauthorized use of your computer by freezing the mouse pointer
MARU-Blaster	marublastersetup.exe	542Kb	98/Me/XP/NT/2000	Free	Delete your recent documents lists to keep things private
Multi-Pass	multipass.zip	844Kb	98/Me/XP/NT/2000	Free	Store your private information securely on your computer
Mutilate File Wiper	mutlfirst.exe	567Kb	98/NT	30-day trial	Ensure that sensitive files are securely deleted
My Old Safe	mosafe21.zip	692Kb	98/Me/XP/NT/2000	Free	Quick and easy password protection for Windows
Ncrypt TX	NCryptTXtrial16.zip	419Kb	98/Me/XP/NT/2000	30-day trial	A file encryption utility for Windows
Network and Dial-up Password Revealer	npasrev.zip	565Kb	98/Me/XP/NT/2000	Free	View logins and passwords for access to the Internet or LAN
nscript	nscriptw.zip	23Kb	98/Me/XP/NT/2000	Free	An encryption utility with unlimited key length
Omniquad MyPrivate	mypriv.zip	2,596Kb	98/Me/XP/NT/2000	Free	Clean up Internet history and temporary office files
Outblitz	outblitz.exe	832Kb	98/NT/2000	Free	A fully featured password manager
Outlook for Outlook	wboload.exe	173Kb	98/Me/XP/NT/2000	Free	Add message encryption capabilities to Microsoft Outlook 2000/2002/2003
Outlook Express Key	oekeyd.exe	538Kb	98/Me/XP/NT/2000	Limited trial	Recover passwords for Outlook Express identities
P2P Identity Secure	P2Psecure.exe	986Kb	98/Me/XP/NT/2000	Free	Keep your online activities private and hide your IP address when using file-sharing tools
Panda QuickRemove for Sasser.A	pqremovb.com	1,700Kb	98/Me/XP/NT/2000	Free	Remove the Sasser.B virus from your PC
Panda QuickRemove for Sasser.A	pqremove.com	1,340Kb	98/Me/XP/NT/2000	Free	Remove Sasser.A from your computer
Paq KeyLog	eng1204.exe	546Kb	98/Me/XP/NT/2000	Limited trial	Log all keyboard events with this tool
Parental Filter	ParentalFilterSetup.exe	7,360Kb	98/Me/XP/NT/2000	Free	Block your child from entering harmful explicit websites
PassGen	passgen2.exe	338Kb	98/NT	Free	Generate passwords quickly and easily
Passlock	pslsetup.exe	271Kb	98/Me/XP/NT/2000	Free	A safe and easy way to keep passwords safe
PassPack	passpack.exe	15Kb	98/Me/XP/NT/2000	Free	A great compact manager program for Windows
Passware Recovery Kit	kitd.exe	2,008Kb	98/Me/XP/NT/2000	Limited trial	Recover any manner of password from your computer
Password Agent Lite	pwagnt21.exe	997Kb	98/NT/2000	Free	Store all your passwords so you don't get locked out of programs or websites
Password Cracker	pwdcrack.zip	29Kb	98/Me/XP/NT/2000	Free	Find out your forgotten passwords
Password Depot	pddepot6.exe	2,329Kb	98/Me/XP/NT/2000	Limited trial	Keep your passwords secure and in one place
Password Director	pwdtr.zip	904Kb	98/Me/XP/NT/2000	Limited trial	Powerful and versatile password manager
Password Generator	password-generator.exe	516Kb	98/Me/XP/NT/2000	Free	Generate secure passwords for use wherever a password is required
Password Keeper	pwdokrn.exe	315Kb	98/Me/XP/NT/2000	Limited trial	Securely store all your passwords in a single, protected location
Password Keychain	passkeychain_setup.exe	934Kb	98/Me/XP/NT/2000	Free	Manage the passwords you need to access with this program
Password Manager XP	PwdManager-Setup.exe	320Kb	98/NT	Limited trial	Keep your passwords secured from prying eyes
Password Provider	passwordprovider.exe	253Kb	98/Me/XP/NT/2000	Free	Easy, quick and secure password creation utility
Password Recovery Toolbox	prtbx.zip	768Kb	98/Me/XP/NT/2000	Free	Recover Internet Explorer, Outlook Express and network passwords
Password Spyer 2K	spyer2k.zip	54Kb	98/Me/XP/NT/2000	Limited trial	Uncover passwords hidden by asterisks, such as Windows or FTP login passwords
PC Activity Monitor Pro	pca_pro.zip	75Kb	98/Me/XP/NT/2000	Limited trial	Log the activity of users on your computer
PC Inspector - e-maxx	pcl_emaxx.exe	732Kb	98/Me/XP/NT/2000	Free	Securely delete any data from hard drives
PC PhoneHome	PCPH.zip	1,670Kb	98/Me/XP/NT/2000	Limited trial	Track your stolen computer with this handy email program
PC Remote parental control	pcrtsetup.exe	225Kb	98/Me/XP/NT/2000	Limited trial	A powerful Internet monitor program and parental control system
pcAudit	pcaudit.exe	44Kb	98/Me/XP/NT/2000	Free	A free security evaluation program for Windows
PC-Safe	pc_safe_21.zip	288Kb	98/Me/XP/NT/2000	Free	Store login information on your computer
PEC Security Master	decumdemo.exe	1,840Kb	98/Me/XP/NT/2000	Free	Keep unwanted users out of your computer
Perfect Process	ppfree.zip	3,300Kb	98/Me/XP/NT/2000	Free	Scan for back doors and spyware
PGP (Pretty Good Privacy)	PGP802_FF_W.zip	8,440Kb	98/Me/XP/NT/2000	Free	Encrypt your email conversations using this uncrackable encryption tool
PIFs	PIFs450.exe	625Kb	98/Me/NT/2000	Free	Keep your passwords and PIFs safe with powerful 448-bit Blowfish encryption
Pop-up and Privacy Defender Pro	PAPOP_0.4a.exe	535Kb	98/Me/XP/NT/2000	Limited trial	Stop annoying pop-up windows
PortBlock	portblock.zip	1,466Kb	98/Me/XP/NT/2000	Limited trial	Lock your open ports with this quality security tool
PowerCrypt 2000	pcrypt4.exe	1,690Kb	98/Me/XP/2000	Free	Use a highly secure algorithm to encrypt your files
Primerius Firewall Lite	PrimeriusFirewallLite.exe	653Kb	XP/2000	Free	Protect your system against intrusion from the Net with this robust firewall
Privacy Defender	PIED_0.2a.exe	417Kb	98/Me/XP/NT/2000	Free	Clean up your Internet history

Win32.Worm.Sasser Removal Tool	Antisasser-EN.exe	58Kb	XP/2000	Free	Eradicate all traces of the self-replicating Sasser worm from your system
WinDefender	windefender.zip	780Kb	98/M/XP/NT/2000	30 day trial	Protects files and folders by making it impossible to delete them
WinGuard Pro 2004	wgpro.exe	750Kb	98/M/XP/NT/2000	Free	Lock certain elements of Windows to deter unauthorised access
WinPatrol	wsetup.exe	782Kb	98/M/XP/NT/2000	Free	Detect which programs start on your computer
WinSecure IT	winsecure.exe	61Kb	98/M/XP/NT/2000	Free	Much like the Windows NT Lock system
Word Decryptor	wdssetup.exe	430Kb	98/M/XP/NT/2000	Free	Protect programs, windows and webpages
Word Key	wordkeyd.exe	943Kb	98/M/XP/NT/2000	Free	Recover passwords for Word documents
WordPerfect Key	wpkeyd.exe	625Kb	98/M/XP/NT/2000	Limited trial	Recover your WordPerfect document passwords
WSecurity	WSecur.zip	97Kb	98/M/XP/NT/2000	Free	Protect your data with this mail security tool
X-Cleaner Freeware	xcleaner_free.exe	418Kb	98/M/XP/NT/2000	Free	Protect your computer from spyware
Xtizo	XtizoSetup.exe	730Kb	98/M/XP/NT/2000	Limited trial	A secure password manager that protects data with blowfish encryption
XP	XPY-0-7-bin.zip	37Kb	XP	Free	Close some of the default security threats in Windows XP such as the RPC service
Zero Footprint Crypt	zero_footprint_setup.exe	3,252Kb	98/M/XP/NT/2000	Free	Encrypt your files with the Blowfish algorithm - includes an image viewer and media player

PCs are capable of performing a wide range of tasks, and with the right tools at your disposal, composing your own music is over a hill.

Making music.

Technology is constantly evolving, which means that PCs become more powerful in an almost daily basis. There is no part of the average home computer setup that is left untouched by progress and this includes the sound card. For those who find the PC's innards somewhat of a mystery, this is the part of your PC that generates sound effects and music, and that the speakers on either side of your monitor connect to.

In the early days of the PC, the only thing that made sound was the beeper – a single small speaker built into the case of a PC. This is still around in modern PCs and its main purpose back then (and now) was to make angry noises when the user did something wrong.

As time moved on, games made use of this

wimpy speaker to play music or create special effects, but something more effective was needed. It arrived in the form of the sound card, an add-in component that slotted into the main PC motherboard and effectively added music-making capabilities. It was always accompanied by stereo speakers, which usually took up residence on either side of the monitor.

Early sound cards were initially based on simple sound synthesis, as was the fashion at the time, but soon digital audio recording and playback were added, meaning the card could playback pre-recorded snatches of audio or music. This might be a realistic explosion in a game or a clip of a recording artist.

As time went on, the quality of both aspects of the sound card increased. Sound became

richer with stereo imaging, effectively meaning the quality of audio CDs, whilst the music-making capabilities started to use 'wavetable' (samples of real instruments that are slightly manipulated). Although their development was originally driven by the desire for more realistic gaming, sound cards soon found themselves infringing on the territory of professional music-making equipment.

After years of development, even the most basic sound card built into a PC is a highly capable music-making device. All you need is some software, and you'll find a generous selection packed onto this issue's PC Utilities Plus+ DVD-ROM. In this feature, we will explore the principles behind making music. No talent is required – all you need is a little patience and the desire to learn.

What Hardware Will I Need?

You probably already have the makings of a basic setup for composing music on your PC. Virtually all modern sound cards include wave-table synthesised sounds, as well as the ability to playback sampled sounds. The only additional piece of equipment you need is a sequencer program. Things become problematic when you want to input music, however. It's possible to enter notes individually using the mouse and the computer's QWERTY keyboard (so-called 'step editing'), but this lacks the fluidity of actually playing tunes using a musical keyboard.

It's possible to attach any MIDI-equipped musical keyboard to your PC (even inexpensive children's keyboards have the required MIDI ports nowadays), you simply need to get hold of a MIDI-to-PC cable. These can be bought from most specialist musical instrument shops or even PC spares shops. Usually they

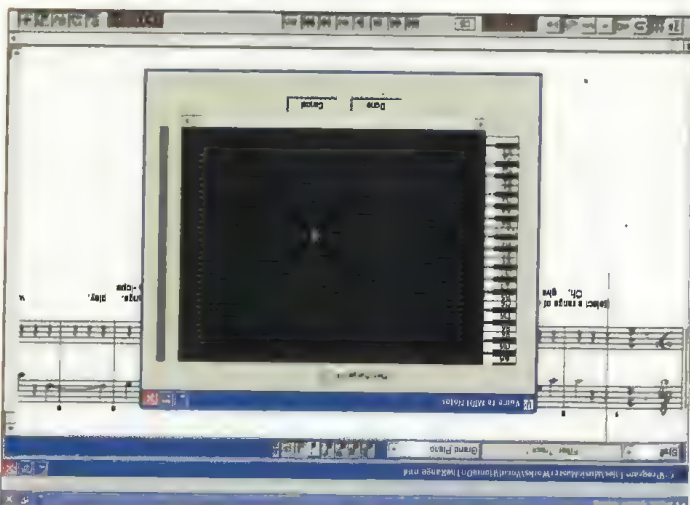

A MIDI cable is all you need to attach synthesises to your PC and input music

duces music – to all intents and purposes you're controlling a musical instrument that is separate from the PC. Of course, it's also possible to plug in musical synthesizers and control these into the sequencer program. For this, you'll need a MIDI lead for your PC. For more details, see the What hardware will I need? box above.

"AS YOU MIGHT EXPECT, THE AVERAGE TUNE INVOLVES HUNDREDS OF THESE 'NOTE ON' AND 'NOTE OFF' MESSAGES EVERY SECOND"

ware controls the sound card and thus pro-

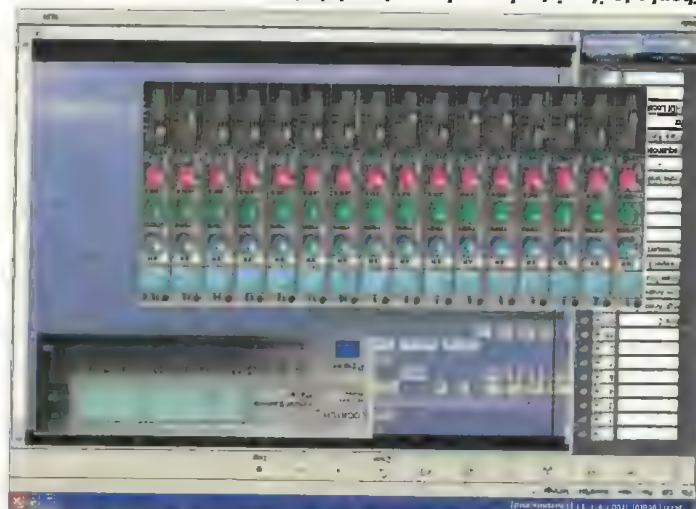

Music MasterWorks is a shareware MIDI sequencer that is ideal for non-musicians

are sent and no actual music or audio is sent through the cable.

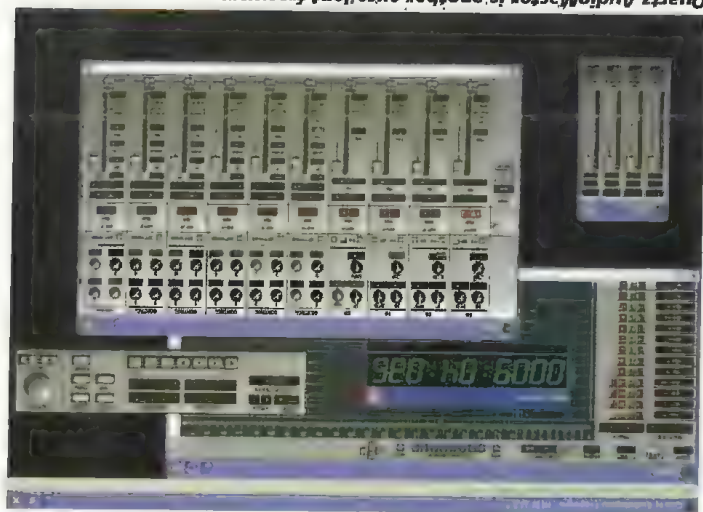

As you might expect, the average tune involves hundreds of these 'note on' and 'note off' messages every second and every instrument that needs to be controlled is sent the musical data. In order to control all the instruments, a computer program called a MIDI sequencer is used. This effectively records all the note on and off messages and lets you manipulate them, as well as save them to disc.

A MIDI sequencer can be used on a PC that doesn't have any musical instruments attached. The sound card and software work

on your PC. The principle of MIDI is simple. It takes the form of a set of cables, which are used to connect musical synthesizers together. Each keyboard has at least a MIDI IN and a MIDI OUT port. Rather than sending actual audio signals down the cable, only the musical data is sent. In other words, when you press a key on a musical keyboard, the keyboard sends a signal via MIDI saying that a note has been pressed. When you let go of that note, the keyboard sends another message saying the key has been released. In both instances, only small quantities of data

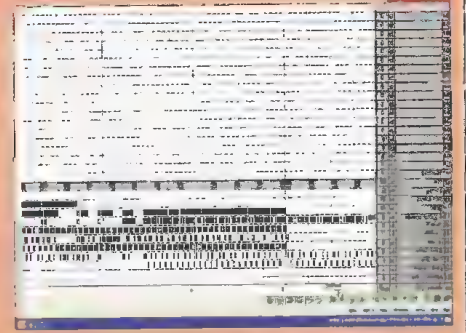

Thanks to its virtual sampler and cool design, MIDI Locator Free! is far more than a standard MIDI sequencer

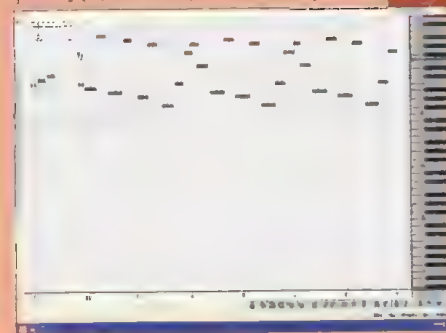

Quartz AudioMaster is another excellent freeware audio and MIDI sequencer

Create MIDI music with Jazz++

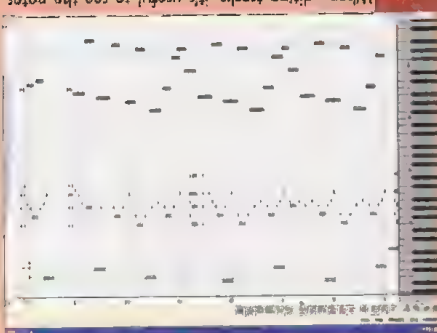

1 Jazz++ is a MIDI sequencer with powerful audio features. The Track display is the first thing you see when you load Jazz++. Each horizontal line represents a note. To record a new track, or to record more notes over an existing track, highlight the track and press record

2 To see what notes have been recorded for each track, right-click over the track name to open the Piano Roll window. Follow the horizontal gridlines to work out which notes are already recorded. You can paint on your own notes and move or delete existing ones

3 When editing tracks, it's useful to see the notes that have been recorded in the other tracks. Clicking the Show Events button displays all the notes recorded in your piece of music. You can now accurately line up the tracks' notes to ensure there are no unpleasant sound clashes

"PART OF THE BENEFIT OF USING A COMPUTER TO SEQUENCE IS THAT THE MUSICAL DATA CAN BE DISPLAYED AND MANIPULATED GRAPHICALLY"

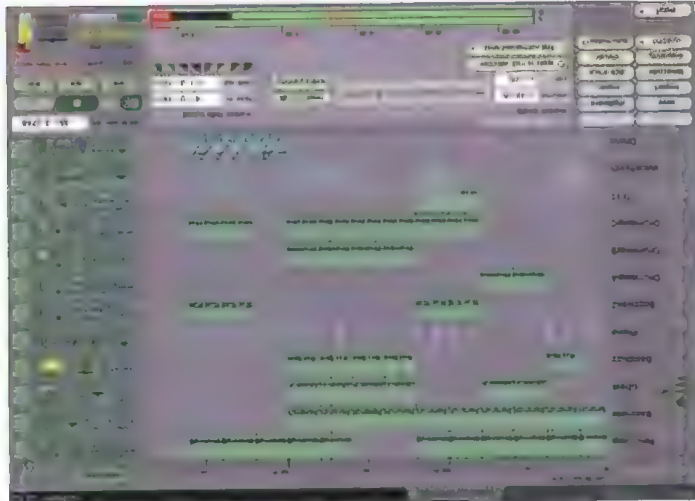

Part of the benefit of using a computer to operate one musical instrument on the way of working is for each MIDI channel to put on one MIDI channel. The standard number of musical notes, but can only out-

Sampling a noise (such as a vocal snatch) via a PC in order to use it as a musical instrument doesn't present any technical issues. However, there's very little software around that allows you to do this easily. There almost certainly isn't any soft- ware that allows the quick and easy sam- pling and then playback via a keyboard

that gave rise to hits such as 'Me & Kim's 'Respectable' in the 1980s. In most instances, you'll need to use the software that comes with the sound card to create a new sound 'patch' from the sample. This requires knowledge about how sound syn- thesis works, such as how to create the ASDR envelope. Very few budget sound cards offer these kind of functions - in most cases you'll have to purchase cards

aimed at the power user.

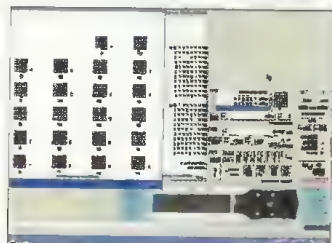

Sampling

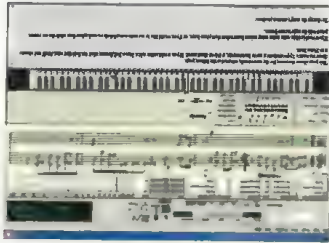

Delta 5P isn't recommended for novices, but this freeware sequencer and .wav editor is packed with features

sequence is that the musical data can be displayed and manipulated graphically. This is usually done on a grid, with each note appearing as a black bar at various co-ordinates depending on its pitch (the size of the bar indicates the note's length). However, you can also view the music as a score, as well as in various other clever ways that are designed to help you manipulate the data.

More importantly, you can also manipulate the musical data in various ways. Perhaps the most important of these is 'quantising' – effectively 'tidying' up your playing by shifting notes onto the beat. Although a metronome usually sounds whilst you're recording, even the best of us sometimes play a little messily and miss the

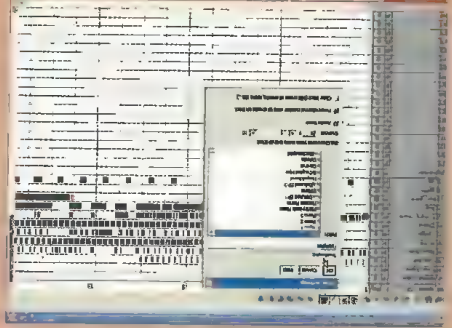

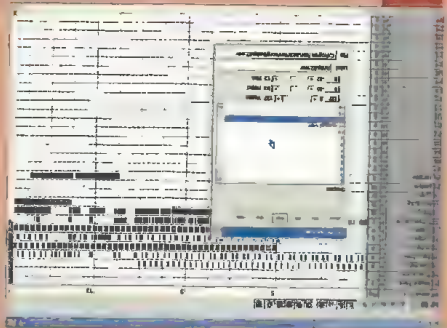

Desktop Guitarist enables users to create MIDI files or practice the rhythm guitar from the Windows desktop

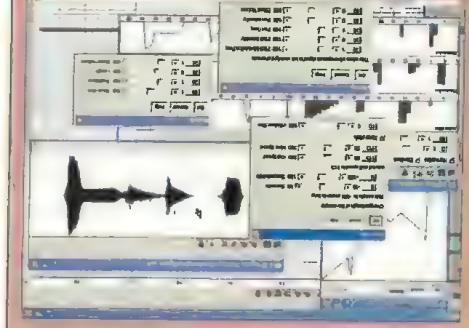

Anvil Studio is one of the best known freeware MIDI sequencers and audio-recording tools

Jazz++ lets you play audio sounds as if they were MIDI sounds, which means there is no limit to the library of sounds you can use. To load sample settings, and select the .wav files from your hard drive.

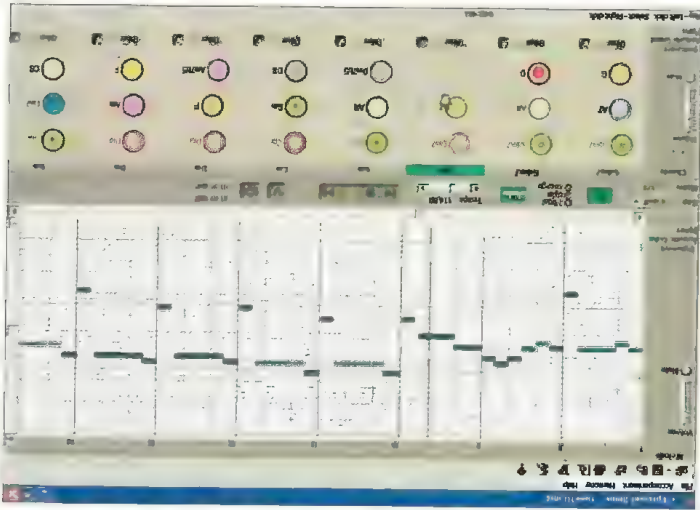

Jazz++ displays the Track Settings window. Give the track a name and, most importantly, click the Audio

Once you've recorded your audio track, you have a large selection of tools at your disposal to alter the sound of the samples. Click on one of the notes, and you'll see the .wav file. Now you can open up windows to add effects.

e-Pressor can create chord progressions that complement your MIDI melody

Quantising automatically fixes this beat. Quantising on the time signature and, depending on the data is usually 'quantised' to the nearest 16th note (ie the nearest semiquaver). Quantising isn't limited to tidying up, however – it can also move notes off the beat in subtle ways in order to emulate a 'swing' style of playing, for example. Not only can you quantise timing, but the volume can also be fixed (ie how loud the note is played depending how hard you hit the key).

A good sequencer will also allow data other than musical information to be recorded, such as instrument changes or pitch bend-wheel data. Other standard features of sequencers include transposing tools and the ability to copy and paste sequences of music.

Most modern sequencers also include audio capabilities, something which is quite useful if you don't know what a tone is. To combat this, the sample sequencer program was invented. This is effectively

Sample sequencing

Even the most basic sequencer requires one thing that most of us lack – musical ability. You need to know the basics about music to be able to use a sequencer, if only to understand the terminology. There's a little point in being able to quantise to the nearest quarter if you don't know what a quarter is, and transposing a tune by two semitones is useless if you don't know what a tone is.

This turns the MIDI sequencer into a complete PC-based musical studio.

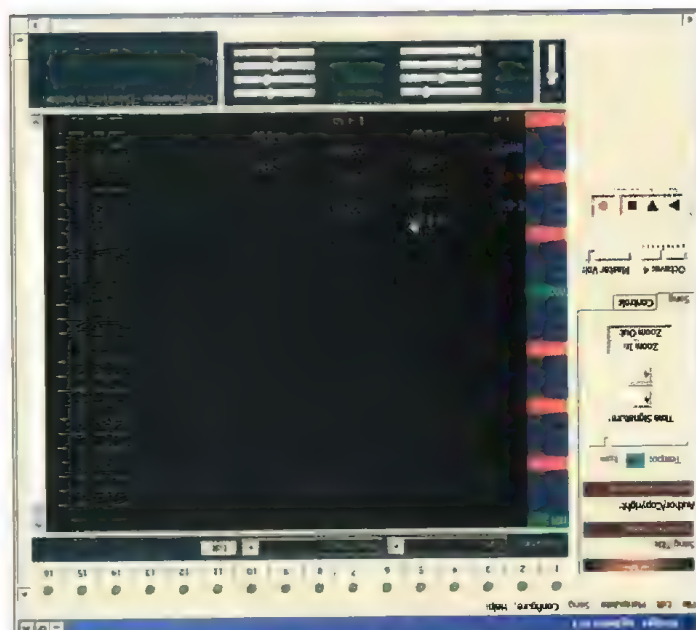

musical sequencing with all the hard work taken out, instead of manually inputting notes and melodies, you manipulate chunks of ready-made musical samples (usually four beat bars of music). Hundreds of these are provided and they're all matched in key and time signature so that they work together.

Making music is therefore simply a matter of clicking and dragging various samples onto a timeline system similar to that used in MIDI sequencing, and seeing whether they work - it's a musical form of pairing by numbers. The user is offered guidance in their choice of samples (they're catalogued as 'bass lines' or 'chords', for example) and it's possible for even the most musically inept to create impressive tunes.

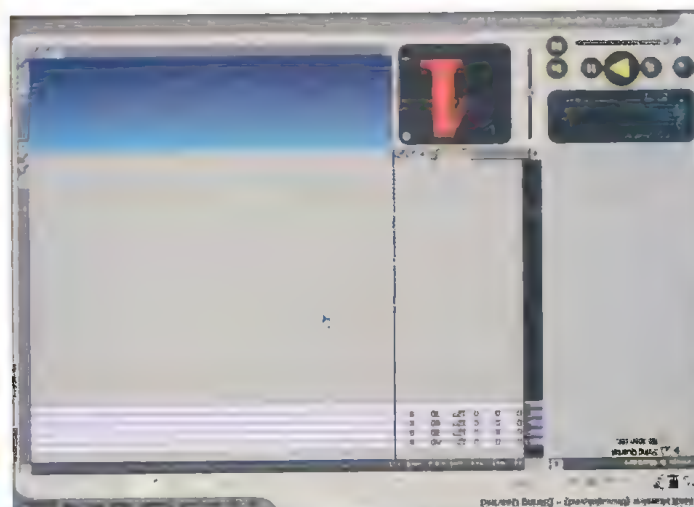

The very best sample-sequencing programs enable users to record their own samples or use special effects add-ins to heavily manipulate those that are built-in. And before you ask, yes, the samples are copyright free, so if you so desire you can attempt an assault on the pop charts with what you come up with.

The problem with sample sequencers is the very thing that makes them easy to use: the samples of music that they offer. Often these are clichéd and can vary enormously in quality. Creating tunes has been made easy by sample sequencers, but creating *original* music is all-but impossible.

Midget looks very different to typical MIDI sequencers to make it easier for non-musicians

MIDI Maestro is designed for use in live performances and as such, is highly powerful

Electronic music

A small electrical component called the oscillator brought about modern electronic music. The oscillator was able to emit electrical pulses at changeable frequencies, which corresponded to the frequencies of musical notes.

One of the oscillator's first musical uses was in the Theremin, which was invented in 1920. This was unique in that it used radio frequencies to sense where the player's hand was in the air. However, moving the hand would alter the pitch of the musical note.

Various other attempts at the production of electronic music were made in following years, usually as part of various avant garde movements. These include Musique Concrète in the 1940s, which involved using tape recorders to manipulate and repeat snatches of audio.

It wasn't until the 1970s that electronic music became firmly established with the invention of the Moog synthesizer. A variety of musical acts incorporated the new electronically all pop music.

They were followed by the likes of Jean Michel Jarre, Tangerine Dream and Vangelis in the 1980s. By then, digital technology had influenced synthesizer design, with the infamous Yamaha DX7 introducing FM synthesis. The sampler, in the form of the Fairlight and Emulator instruments, also took hold. Sampled sounds and synthesis would eventually be combined to form the groundbreaking Korg M1.

In the 1990s, synthesizers, samplers and acoustic instruments were used interchangeably and it became increasingly hard to tell the three apart. In our modern age, electronic music is perhaps best personified by techno music, which is found in the nightclubs of Ibiza, but synthetically sounds find their way into virtually all pop music.

High science met music making when the Moog was invented, pictured here with its inventors

Audio & Video

In this issue's Audio and video section we have gathered together a generous selection of almost 400 tools to help you turn your PC into a desktop media player. You'll find everything here from simple .mp3 players to audio-conversion tools, and from video editors to DVD-recording software. There are plug-in tools for Winamp, CD extractors and you'll even find tools to help you burn your own audio CDs. Whether you fancy yourself as a budding movie director or a club DJ, we've got just the tools you need.

0303	0303.zip	159KB	98/M/XP/NT/2000	Unlimited trial	Turn your PC's piezoelectric speaker into a beat machine
0-Strike MP3 Scanner	0s_mpscan.zip	613KB	98/NT/2000	Free	Scan your LAN for .mp3 files
1Click DVD Copy	1clickdvdcombosetup.exe	4,500KB	98/M/XP/NT/2000	Limited trial	Create and update playlists for your media files
1Click DVD to Moeg Mpg	dvdtompeg.exe	973KB	98/M/XP/NT/2000	Limited trial	Make backup copies of your DVD movies
1Click DVD to SVCD	dvdtosvcd.exe	975KB	98/M/XP/NT/2000	Free	1 Click DVD to Mpeg conversion
1Click DVD to VCD	dvdtovcdd.exe	975KB	98/M/XP/NT/2000	Free	Easy-to-use DVD to SVCD converter
1st AVI to DVD	clonedvd.exe	2,480KB	98/M/XP/NT	Limited trial	Copy DVD to VCD and convert DVD to VCD
1st Clone DVD	clonedvd.exe	1,160KB	98/M/XP/NT/2000	Limited trial	A powerful utility for video file converting
2xAV Plug-In for Windows Media Player	2xAVWMP_InstallPHE.exe	1,590KB	98/M/XP/NT/2000	Limited trial	Make perfect clones of your DVD movie discs
3D MP3 Sound Recorder	3drec.exe	1,003KB	98/M/XP/NT/2000	Limited trial	A great plug-in for Windows Media Player
4-Track MP3 Mixer	mp3mixer.exe	3,220KB	98/M/XP/NT/2000	Limited trial	Record sounds played through your sound card
AAA DVD Ripper	svdvd.exe	944KB	98/M/XP/NT/2000	Limited trial	Mix your .mp3s with this handy program
ABC Video Roll	abc_2570.zip	2,421KB	98/NT/2000	Free	Convert DVD movies into DivX or MPEG formats
Abom navi	abomnavi.zip	221KB	98/M/XP/NT/2000	Free	Join two separate video files into one
Abynth	Abynthpccdemo.exe	5,047KB	98/M/XP/NT/2000	Limited trial	Link up to 128 random noises to create your own cacophony
ABView	ABView.zip	1,670KB	98/M/XP/NT/2000	Limited trial	Simple multi-format viewer
AbysAudio Pro	abyspro.zip	372KB	98/M/XP/NT/2000	Free	Clean up your audio files
Ace DVD Copy	AceDVDCopy.zip	1,590KB	98/M/XP/NT/2000	20-day trial	Back up DVD movies to VCD, SVCD, DivX or .avi formats
Ace-High MP3 Recorder	mp3recorder.exe	835KB	98/M/XP/NT/2000	Limited trial	Record sound from your computer to .mp3 or .wav files
AcePlayer	aceplayer.exe	2,006KB	98/M/XP/NT/2000	Free	Play songs and movies and view .images
Acoustica MP3 Audio Mixer	Acoustica-MP3-Audio-Mixer-Installer.exe	1,400KB	98/M/XP/NT/2000	Limited trial	Create your own DJ-style mix CDs and broadcast DJ sets via the Web
Advance MP3 sound recorder	amrec.zip	713KB	98/M/XP/NT/2000	Limited trial	Record sound from any audio program
Advanced AVI Splitter	avisplit.exe	707KB	98/M/XP/NT/2000	Limited trial	Movie splitter, audio extractor and video frames grabber
Advanced CD Ripper Pro	advanced-cd-ripper-pro.exe	1,830KB	98/M/XP/NT/2000	Limited trial	Rip audio CDs into a range of digital formats – skinable and fully CDDA-compatible
Advanced Encode Decode Tools	aedtools.zip	6,360KB	98/M/XP/NT/2000	Limited trial	Convert audio between formats with this tool
Advanced MP3 Converter	advanced-mp3-converter.exe	2,060KB	98/M/XP/NT/2000	Limited trial	Quickly convert .mp3, .wma, .ogg and .ape files to .wav and .wav files to .mp3
Advanced MP3 Home Station	audiocd.exe	5,976KB	98/M/XP/NT/2000	Limited trial	A beginner's intro into the world of CD burning
Advanced MP3 Search	am3bst.exe	199KB	98/M/XP/NT/2000	Limited trial	Search for music and retrieve .mp3 and .wav files
Advanced Phone Recorder	aprec.exe	1,670KB	98/M/XP/NT/2000	Limited trial	Record phone calls to your hard drive with this useful tool
Advanced WMA Workshop	awmaw.exe	5,450KB	98/M/XP/NT/2000	Limited trial	Encode .wav and .mp3 files into the .wma (Windows Media Audio) format
Album Tracker	atd.exe	630KB	98/M/XP/NT/2000	Limited trial	Catalogue your music collection
Alcohol 120%	Alcohol120_trial_1_4_8_1222.exe	3,510KB	98/M/XP/NT/2000	30-day trial	A superb CD- and DVD-burning and copying application
Alive Text Ripper	AliveCDripper.exe	5,780KB	98/M/XP/NT/2000	Level limited	A powerful and easy-to-use CD ripper
Alive Text to Speech	AliveTextToSpeech.exe	1,100KB	98/M/XP/NT/2000	Free	Text to speech reader – hear words through your speakers
All Editor	asetup.exe	2,760KB	98/M/XP/NT/2000	Limited trial	Create a professional music studio on your desktop
All Media Fixer	MediaFixer.exe	1,007KB	98/M/XP/NT/2000	Free	Repair partially downloaded or damaged audio and video files
All My Movies	amm_setup.exe	1,447KB	98/M/XP/NT/2000	Free	Tired of managing movies – use this database
All Sound Recorder	all-sound-recorder.exe	1,380KB	98/M/XP/NT/2000	Limited trial	Record sound from media players or any other sound source
All to Wave Converter	wave-converter.exe	1,050KB	98/M/XP/NT/2000	Limited trial	Convert .mp3, .wma and .ogg files into .wav format – supports normalisation
All to WMA Converter	all2wma.exe	4,774KB	98/M/XP/NT/2000	Limited trial	An audio conversion program which allows you to convert .mp3 files to .wma format
All Video Splitter	avsplitter.exe	1,510KB	98/M/XP/NT/2000	Limited trial	Create video clips with some neat features
AI2WAV Recorder	awsetup.exe	343KB	98/M/XP/NT/2000	Free	Record virtually any sound source – including streaming audio – to .wav files
Alapsoft Cleaner for Amateur Video	avcleanup.exe	306KB	98/M/XP/NT/2000	Limited trial	Clean your video with this tool for Windows
Alapsoft Lossless Video Codec	avcodec_setup_1.6.exe	147KB	98/M/XP/NT/2000	Free	Capture and compress video from a TV card or analogue video source
AMF Multimedia Jukebox	jukebox.exe	251KB	98/M/XP/NT/2000	Free	Multimedia jukebox program for Windows – take control of your tracks!
Ampand	ampband576.exe	262KB	XP/NT/2000	Free	Display the media name being played in Winamp 2/5, Power DVD and other programs
AralegX BitPolice	bpolicy.exe	134KB	98/M/NT	Free	Manage DirectX audio plug-ins
AralegX Bound	bound.exe	151KB	98/M/NT	Free	Clamp an audio stream to maximum value
AralegX DXMan	dxman.exe	182KB	98/NT/2000	Free	Manage your DirectX audio plug-ins
AralegX Vocal Remover (Winamp)	vremover.exe	177KB	98/NT	Free	Strip out the vocal content from your .mp3 files
Analyzer Recording	AnalyzerRecordingSetup.exe	148KB	98/M/XP/NT/2000	Limited trial	Capture an image from any windows with this program
Animator-9	animator.zip	440KB	98/NT	Free	Animate your digital camera images
Anvil Studio	anstudio2.exe	3,350KB	98/M/XP/NT/2000	1-minute limit	Compose, edit and sequence MIDI – upgrade to the Pro version to create longer tracks
Anvil Studio Upgrade	astu.exe	1,850KB	98/M/XP/NT/2000	Free	An upgrade for Anvil studio (install after you have installed the main program)
Apollio DVD Backup Pro	apoliodvdback.exe	1,720KB	98/M/XP/NT/2000	Limited trial	Back up your DVD movies to .avi, SVCD, DivX and XviD formats
ASX Maker	ASXMaker.exe	162KB	98/M/XP/NT/2000	Free	Create a playlist from your video files
AtomixMP3	atomixmp3_trial.exe	3,110KB	98/XP/NT/2000	Limited trial	Mix .mp3s on your computer like a real DJ
audirect	audirect-fastest.zip	28KB	98/M/XP/NT/2000	Free	A fast and easy to use ActiveX-OCX component
Audacity	audacity-win-1.2.0.exe	2,640KB	98/M/XP/NT/2000	Free	Create, edit and mix sounds with this free program
Audio Conversion Wizard	acwizd.exe	5,96KB	98/M/XP/NT/2000	Limited trial	Quickly convert audio files between different formats
Audio Edit -	AudioEdit.exe	8,795KB	98/NT	Limited trial	Decoder and editor for .mp3, .p us graphical .wav editor/recorder
Audio MP3/WMA Recorder	mp3-wma-recorder.exe	5,009KB	98/M/XP/NT/2000	Free	Software for recording audio streaming
Audio Record Wizard	arw3.zip	2,410KB	98/2000	Free	Record audio files directly from your sound card

98/M/XP/NT/2000	Free	Software for recording audio streaming
98/2000	Free	Record audio files directly from your sound card

Utility name	File name	File size	System	Notes	Description
Audio Station	audio_station.exe	13.476Kb	98/M/XP/NT/2000	Free	Play back your favourite audio files
Audio Streamer	ast1.exe	4.858Kb	98/M/XP/NT/2000	Free	Stream audio off the Net with this tool
Audio Surgeon	assurgeon.exe	13.395Kb	98/M/XP/NT/2000	Free	Cut audio files down to size
Audio Switch	au_switch.zip	58Kb	98/NT/2000	Free	Switch between different audio sources to compare quality
AudioBank 2003	audiobank2003.exe	3.850Kb	98/M/XP/NT/2000	Limited trial	Manage your music easily with this tool
AudioBlock Edit	audioblockedit.msi	401Kb	98/M/XP/NT/2000	Free	Block-edit audio files with this program for Windows
Audiofilter	audiofilter.zip	245Kb	98/NT	Limited trial	Filter .wav files and encode them as .mp3s
AudioGrabber	agrabber.exe	1.417Kb	XP	Limited trial	Record music digitally from your CD-ROM drive
AudioGrabber	agrabber.exe	1.417Kb	98/M/XP/NT/2000	Free	Record music digitally from your CD-ROM drive
AudioLib MP3 Recorder	alrecorder.exe	1.584Kb	98/M/XP/NT/2000	Free	MP3 recorder program for Windows
AudioRight Recorder	arec2.exe	7.580Kb	98/M/XP/NT/2000	Limited trial	A great audio CD burner with conversion software included
AudioShaker	audioshaker.zip	2.550Kb	98/M/XP/NT/2000	Limited trial	Record voice from microphone, internet streaming audio or mp3s
AudioSphere	asphere.exe	655Kb	98/NT	Free	Listen to and organise your .mp3 audio collection
AudioStudio	audiostudio.exe	9.331Kb	98/M/XP/NT/2000	Limited trial	Find, organise, convert and transform with this program
AudioTools	atools160.exe	5.206Kb	98/NT	Limited trial	Record audio cassettes or vinyl LPs as .mp3s or burn to CDs
Autopics	autopics.zip	9Kb	98/M/XP/NT/2000	Free	An instant slideshow creator
AV MP3 Morph	mp3morph.exe	5.447Kb	98/M/XP/NT/2000	14-day trial	Morph together .mp3s and create neat effects with them
AV3	AV3demo.exe	997Kb	98/M/XP/NT/2000	Free	Edit movies on your PC and capture the contents of your desktop
AVCataloger	avwebsetup.exe	160Kb	98/M/XP/NT/2000	Free	Catalogue your favourite music, video and books
AVD Video Processor	avdp.zip	1.004Kb	98/M/XP/NT/2000	Limited trial	A useful program for converting video files into different formats
AVI Constructor Pack	AVIconstructor.exe	2.269Kb	98/M/XP/NT/2000	Limited trial	Convert still images into animated .avi videos
AVI Edit	avedit.zip	72Kb	98/M/XP/NT/2000	Free	Edit small video files
AVI2Bmp	avi2bmp.zip	105Kb	98/M/NT/2000	Free	Convert .avi movie files to individual frames
AVToFrames	AVToFrames-1_setup.exe	459Kb	98/M/XP/NT/2000	Limited trial	Convert an uncompressed .avi into one large .bmp file which ties the frames
AVS Audio Utilities	AVSAudioUtilities.exe	1.1545Kb	98/M/XP/NT/2000	Limited trial	A package of powerful audio utilities
Awave Audio	awaud83.zip	659Kb	98/NT	30-day trial	Convert batches of audio files into different formats
Battery	BATTERY_DEMO.zip	1.417Kb	98/M/XP/NT/2000	Free	Skins, hotkeys and task scheduling for TV-tuner cards
Beat 2000 Jazz Version	b2107jazz.exe	1.644Kb	98/M/XP/NT/2000	Free	Create jazz music with this simple program
Beatburner	bt1_demo.exe	2.555Kb	98/M/XP/NT/2000	Free	A professional sampling program for Windows
BestPlay	BestPlay_Setup.exe	780Kb	98/M/NT/2000	Free	Special multimedia, video and audio program
Blaze DVD Player	BlazeDVDSetup.exe	2.002Kb	98/M/XP/NT/2000	Limited trial	Create a home theatre on your PC
BOOMBox	BOOMBox_Setup.exe	1.832Kb	98/M/XP/NT/2000	Limited trial	Quickly search thousands of online radio stations
BPM-Studio Pro	bpmdemo.exe	8.333Kb	98/M/XP/NT/2000	Free	Run two players together and mix the tracks with this tool
BPS Audio Converter Pro	bpscp3d.exe	9.677Kb	98/M/XP/NT/2000	Limited trial	Convert audio with this super conversion program
BRES MIDI Editor	bresmidi.zip	309Kb	98/M/XP/NT/2000	Free	A MIDI editor that supports many controls
BspPlayer	bsplayer086499.exe	1.079Kb	98/M/XP/NT/2000	Free	Play back video and audio files
Burn CD Now	burncdnow.exe	1.180Kb	98/M/XP/NT/2000	Limited trial	Burn CDs quickly
Burn VCD	mkvcd.zip	3.100Kb	XP/NT/2000	Free	Quickly burn VCDs of your .mpg files to watch on a DVD player
Business Music System	bms.zip	1.719Kb	98/M/XP/NT/2000	Free	Play background music for shops and places of work
Cam Chaser Pro	CPro302.exe	371Kb	98/NT	Free	A viewer for image-based webcams with numerous options
Carotica	carotica2_installer.exe	2.300Kb	98/M/XP/NT/2000	Free	Audio synthesis and effects tool
caotical bpm calculator	caotical_installer.exe	655Kb	98/M/XP/NT/2000	Free	Compute tempo from the loop time and vice versa
Capturex	Capturexhar.exe	1.270Kb	98/M/XP/NT/2000	Limited trial	Take bitmap snapshots from video files
CD Blaster	cdbl.zip	1.359Kb	98/M/XP/NT/2000	Free	Combine CD burning and ripping with this handy tool
CD MP3 Burner	cd-mp3-burner.exe	1.420Kb	98/M/XP/NT/2000	Limited trial	Make audio CDs from your favourite .mp3s and .wav files
CD Player Maximus	maximus34.exe	768Kb	98/NT	Free	Play CDs and record track and artist information

Miscellaneous

Bringing up the rear on our action-packed DVD-ROM is our collection of games, education tools and programming applications, as well as those utilities that don't really fit into any of our other categories. We have the ideal tools if you want to learn about the geography of the USA or manage your personal finances using a free financial-management program. Alternatively, if you need a break from optimising your Internet connection or streamlining your Windows installation, then why not try out one of the hundreds of titles in our Games and Leisure section.

Where to download

If the thousands of utilities on this issue's cover DVD-ROM don't meet your every need, there are some excellent websites where you can find the programs you require

Live Downloads

www.livedownloads.co.uk

If you're hankering after yet more utilities then what better place to get them than direct from the creator of PC Utilities and PC Utilities Plus+? The Live Downloads website is maintained by the same people who write and produce this magazine, so you're guaranteed quality as well as a massive selection of programs, tools and utilities. You need to register with the site to download files but you can search for free.

access to over 18,000 files

RocketDownload.com

www.rocketdownload.com

No matter what type of utility you're after, Rocket Download.com is well worth a visit. What marks RocketDownload.com out from the crowd is its range of options for registered users. If you find software you like, you can add it to your virtual basket and then download the whole collection in one go using Download Accelerator. Registration is free of charge, so anyone can make the most of this service.

and offers thousands of tools

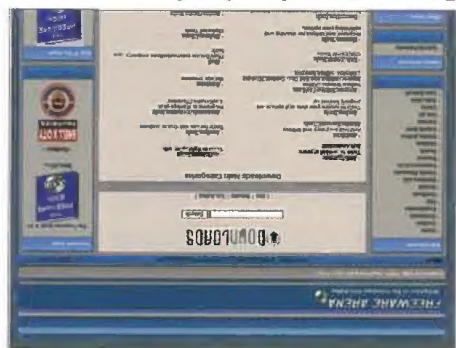

PC Utilities Plus+ • Volume 8

98

Freeware Arena

www.freewarearena.org

Freeware Arena is as much a rallying call as it is a download site, and much space is given over to promoting freeware software. Freeware Arena provides thousands of essential tools, split into a wide range of sensible categories, such as Anti-Spyware, Cleaning tools and XP only. Every tool is guaranteed 100% free so you won't find any shareware or adware at all.

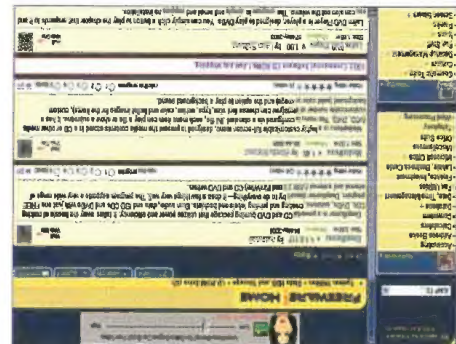

software and offers thousands for download

Freeware Home

www.freewarehome.com

If your freeware search has been thwarted elsewhere, then Freeware Home may be worth a visit. This well-designed download site separates utilities into a large number of categories, making it much easier to locate programs for a specific purpose. It's possible to rate software to share your opinions with others, and overall user ratings are listed on the site so you can filter out the best software from the less reliable.

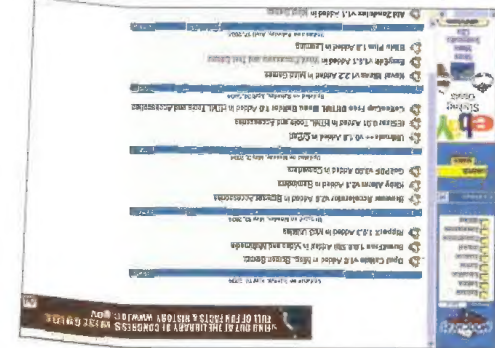

Most programs are rated so you can identify which tools are worth downloading

Moochers Freeware

www.moochers.com

Moochers is another excellent site dedicated to freeware software and you won't be disappointed. The site's opening page makes it easy to see the latest downloads at a glance. The Linux section is available most weeks and the site's opening page makes it as some higher profile sites, but new additions are made regularly. The site may not be updated with the same regularity as some higher profile sites, but new additions are made regularly.

Moochers is another great site dedicated solely to freeware software
